

Pigs are pigs these days. Just $800,000 a month is going to the Farmers of Alberta for their pigs than there was a year ago, so they are well worth looking after. We have good Dry Lumber suitable for Hog Houses, Self Feeders. The cost is small and returns big.

Lacombe News From the Past From Our Files of 31 Years Ago

Teachers of Central Alberta held their convention at Ponoka this week. Forty eight teachers were in attendance. After general routine business the following officers were elected: Hon. Pres., J. F. Boyce, Red Deer Pres., N. E. Carruthers, Lacombe 1st Vice-Pres., Miss Major, Wetaskiwin.

2nd Vice-Pres., Miss Jetkell, Ponoka.

Sec.-Treas., Miss A. L. Mooney, Lacombe.

Executive: Miss C. B. Brown, P. H. Thibaudeau, G. E. Martin.

Married at Bentley, at the bride's home, George Everett and Leone Adamson, by Rev. E. J. Tate.

Born: at Canyon, to Mr. and Mrs. R. J. Munce, a daughter.

Died: at Lacombe, Ruth Clarke Merriam, aged 7 years. The remains were taken to Clarinda, Iowa, for interment.

Lacombe will become a great manufacturing centre. D. J. McLachlan is erecting a large building for a sash and door factory, and is installing the very latest machinery for the production of sash, doors and all building materials. Mr. McLachlan is the builder of the Merchants Bank building.

Work is being rushed on the new and modern hotel at Bentley, and when completed it will be one of the most up-to-date hostelries in Alberta, and will be a boon to the travelling public.

This part of Central Alberta will become the manufacturing centre of this world. Latest industry to be started is a large lumber working plant at Morningside. Two acres have been secured for the site and work will commence at once on the construction of the buildings. Two large engines will be required to operate the machinery, which will be of the latest design. With quantities of timber to the north-west this plant expects to be able to supply the greater portion of Central Alberta with building material.

Rev. J. Leach-Porter, of St. Cyprian's church, held a service at Bentley on Sunday.

Central District: Wm. Moore and son Willard arrived here this week with a car of effects from Dakota. Mr. Moore is a brother of Mrs. C. D. Hayner, of this place.

Born: at Blackfalds, to Mr. and Mrs. Jas. Scott, a son. At Pleasant Valley, to Mr. and Mrs. J. W. Raven, a daughter.

Long Valley: Williams & Co., subcontractors for mile 8 of the new railway east of Lacombe broke the first sod on Monday, on the farm of A. L. Whitten.

Capt. Inskip left for England Saturday. In Montreal he expects to meet his sister who is on her way to visit her brother A. T. Inskip and sister Mrs. Dolmage.

A subscription paper to establish a baseball club is being circulated in town.

Gilbert Burrows has purchased the Scales photograph gallery.

Lacombe Gun Club defeated Red Deer this week by 11 points.

Quite a few of our citizens went out to Bentley last night to hear Major W. B. McPherson's lecture on the U.S. Civil war.

On Friday evening Mrs. A. McKilligan, of near Bentley, entertained a few friends on the occasion of her 26th wedding anniversary.

It is about time the road from Lacombe to Bentley was put in passable shape. At present it is impossible to get over it and travellers are compelled to make long detours through adjoining farms.

It is reported that fall wheat is grown successfully in Southern Alberta. Why not try it in Central Alberta?

Rev. W. R. George, of St. Cyprian's church here, will receive the appointment of rector of Holy Trinity, Strathcona, on the return of Bishop Pinkham from England.

George Gale left on Tuesday for a visit to friends in Calgary.

Registered York pigs for sale. A. D. Swanson, Gull Lake road.

John Segur, of Blackfalls is applying for a Hotel License.

Tenders are asked for the building of Lacombe's new Fire Hall. Tenders to be in the hands of Wm. Crow by Saturday. J. W. Johnston and William Puffer, committee.

Lots for Sale in Hyde Park, Lacombe's ideal residential section. They will be snapped up quickly, so our citizens should take advantage of this opportunity to get in on the ground floor. Lots are 150x240 feet. Sidewalks and streets will be laid out at once. For a short time I can make very easy terms for purchasers. John McKenty.

John Fincham is in Banff taking treatment at the hot springs.

W. J. Hart & Co., have opened an up-to-date drug store on Nanton St., and now have their full stock in.

The town should fix the force pump at Mosley's as it is of great assistance in case of fire.

M.D. CROWN MEETING

The council of the above district met in the Municipal Office on Feb. 16, there being present Councillors Armstrong, Hueppelheuser, Parker, Hand, Hall and Stewart.

Parker: That the council renew their contract with the Red Deer Full Time Health Unit.

Stewart: That labor pay sheet No. 1-34, $127.61 be passed.

Armstrong: That Auditors salary, $200 be paid; That R. M. Gibson be paid balance of account, $10; That the next meeting be held on March 13th at 10 o'clock.

Hand—That the following accounts be paid.

Telephone	5.02
Mrs. Frizzell	35.00
Albert Power	10.00
Bank of Montreal	10.00
Postmaster	20.00
Registrar	100.00
C. P. Reid	9.00
Miss Alcock	3.00
Jenkins Groceteria	13.00
G. H. England	8.00
Can. Ingot Co.	254.05
F. E. Jones	5.00
Calgary Power	1.50
Western Globe	2.30
Municipal News	6.00
Beare's Limited	57.02
Cen. Alta San.	49.50
A. M. Campbell	57.67
A. Gilmour	23.82
Lacombe Mill	6.55
Salvation Army	3.50
Norman Campbell	27.66
Mrs. Dorsey	16.00

Armstrong: That C. J. Felstrom and John Casewell's application for old age pensions be approved.

Hueppelheuser: That the meeting adjourn.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, Minister

Mr. L. D. Wright, Musical Director

Sunday School at 10 a.m.

Communion Service at 11 a.m.

Special Easter Music at 7:30 p.m. The orchestra will play from 7:15 to 7:30.

The Quarterly Board meets on Tuesday, April 3rd at 8 p.m. at the home of Mrs. Misener.

The Ladies Guild meets on Wednesday at 3:30 p.m.

At Jones Valley School a meeting will be held on Easter Day at 3 p.m. at which the speaker will be Rev. R. B. Layton, of Lacombe.

VIMY DINNER

The annual Vimy Dinner, under the auspices of the local branch of the Canadian Legion, will be held in the Church Hall on Monday evening, April 9, at 7:15. The speaker of the evening will be Capt. Robert Pearson, who needs no introduction to Lacombe audiences. Tickets are now on sale at 50c. each. A very large attendance is expected.

TO THE PATRONS AND CREAM SHIPPERS OF THE LACOMBE DISTRICT

We feel that at this time many of our patrons and supporters are wondering if the present price of cream is justified and just what is responsible for the rise in prices and whether or not these prices will continue.

As you probably know, there has developed during the past two years, a more or less new feature in the creamery business, in the form of having cream trucked to the creamery.

We as an organization neither encouraged nor discouraged trucking because we realized it was an added expense that would eventually have to be borne by the producer and we were not sure that the farmer realized this and was really in need of a trucking service. Further cream being a perishable product we believed that the producer would rather deliver it himself and see for himself just how it was handled, and if he wished, discuss with the creamery man his various problems, rather than put it on the truck and not have this opportunity of talking with the creamery man.

Another feature that made us hesitate in adopting any definite policy with regard to trucking was the fact that the man who had his cream trucked received the same price as the one who delivered his cream. This hardly seemed fair to us, because trucking cream is costly and the man who delivered his own cream was actually helping to pay for a service which he was not receiving.

On talking the matter over with our cream shippers, we find that many of them require a trucking service. To them it is almost a necessity. Yet many others say they are coming to town anyway and can easily deliver their own cream—they prefer to do so. This being the case we decided to adopt the following policy which we felt was a fair one to both our many supporters and also to our competitors.

We would assist in arranging for a trucking service for those who desire it. We would pay the recognized market price for cream and pay hauling charges. This of course is what has been done by most creameries during the past year and was we believed fair to all who had their cream trucked and also fair to the those manufacturers who were competing in the same territory as us and who were also trucking cream.

But for those farmers who delivered their own cream, we would pay in addition to the price paid for trucked cream the average cost of hauling. Such a policy we believed the only fair one for all concerned.

Apparently, however, those factories which draw cream from the same territory as we took exception to our adopting this policy and wished to maintain the old policy of the same price for delivered cream as for trucked cream. In an effort to force the issue they met our delivered price and hauled free of charge. We then in order to maintain the policy we had adopted met this new price on trucked cream and of course advanced the price at the same time on delivered cream. When this happens several times you can readily see how quickly the price will get out of line.

The above explanation is our interpretation of the present situation. We have tried to be unbiased in presenting it to you and we feel that our producers and friends welcome such information on these abnormal conditions. LACOMBE CREAMERY.

O. Lundberg, Manager

At St. Cyprian's tea on Saturday afternoon next at the Adelphi Hotel, a 14½ pound fruit cake, donated by Miss Inskip will be given away to the lucky ticket holder. The cake is a beauty, and you may become the owner for 25c. The ladies will probably call on you and sell you a ticket. So be ready.

SPECIAL EXCURSION PROVES POPULAR

Among the people from Lacombe and District who took advantage of the Special Excursion to the Coast were:

Mr. and Mrs. A. Gilmour;
Mrs. Dr. Moore,
Mrs. K. D. McDougall, (Chigwell),
W. Scott,
Mr. and Mrs. Floyd Bruns,
Mrs. Fred Sissons,
Mrs. Roy Gee,
Mr. and Mrs. A. E. Riley,
Mrs. G. E. Lord,
Byron Butcher,
R. F. Butcher,
Clifford Vig,
Mr. and Mrs. Robert Paulsen and daughter.
Mrs. Chas. Boye.
Mrs. John Rathje.

CHOIR CONCERT

One of the most delightful concert ever put on by St. Andrew's Choir was held on Thursday evening, March 22nd. Consisting of request numbers from the congregation, the program, taking the form of a radio broadcast was unique and most enjoyable. Rev. R. B. and Mrs. Layton and Irvin Told, "the family" listening to the radio, "Twisted the Dial" to bring in the Old Homestead Chorus, which was followed by old time songs, All Star Revue, Darky Melodies, Amos and Andy in person, (composed and staged by Mrs. H. E. Wilson and Mrs. J. Lamont); Irish songs and a Seth Parker program with the ladies in old fashioned costumes. Gordon Sweet made an ideal announcer, and A. R. McFadden inserted the French for the Radio Commission at the proper moment. No effort had been spared to work out each feature of the broadcast, and the Choir and their committee are to be congratulated on its success, which, without doubt, assures them of a still larger audience should they ever attempt a similar performance.

Agricultural Society

There was a fair attendance at the meeting of the Lacombe Agricultural Society held on Saturday afternoon in the office of the Secretary, D. F. Chisholm. The affairs of the Society were fully discussed. It was the opinion of the meeting that Dominion Day, July 1st, should be celebrated in a fitting manner, and that a big sports day and stampede should be arranged. It was also thought that a fair, principally for the Schools and younger people should be put on about the end of August, or early September.

H. S. Trame, who has been President of the Society for the past six years, asked to be relieved of this office, and Thos. Wilkes was elected in his place. An executive committee consisting of D. Hay, Robt. McKenzie, E. C. Chapman, C. Sneath, Henry Trame, J. M. Douglas and Jos. Roper was selected from the directorate, to take charge of arrangements for the celebration.

D. F. Chisholm was elected secretary-treasurer. Other officers are Thos. Henderson, 1st Vice-Pres.; H. Langrock, 2nd Vice.-Pres.

WOULD MERGE FAIRS

An amalgamation of the school fair with the annual fair of the Agricultural Society was the main item of business discussed at the annual meeting of the Lacombe School Fair Association, Saturday.

G. E. DeLong, president of the Lacombe Board of Trade, addressed the meeting and a committee was appointed to attend the meeting of the Agricultural Society with a view to bringing about this merging of the two fairs, if found desirable.

Eleven schools were represented last year, but as applications for seed have not yet been received, it is not yet known how many schools will enter this year.

Seed will be furnished by the government.

Officers for the ensuing year were re-elected as follows: President, J. A. Proudfoot; vice-president, Mrs. C. W. Boys; secretary, Mrs. William Chessor.

A combined meeting of the two Societies is expected to be held in about two weeks.

SPRUCEVILLE NEWS

The Spruceville Sunday School are having an Easter concert on Monday evening, consisting of music, recitations and Songs. Everybody welcome. Come and enjoy a pleasant evening, starting at 8:30. A silver collection will be taken. Prof. Wright will furnish music.

Mrs. Barker, Sr., Cliff and Ernie, spent Sunday with Mr. T. Barker's at Ponoka.

There will be a play entitled "All in a Fog," programme and dance in the Hall on Friday evening, April 6, sponsored by the Football Club. Admission to play and concert 35c.; dance 25c. Supper free. Good music.

The Busy Bees have changed their regular meeting night to Friday, April 13th.

We are pleased to hear that Mrs. Kistal, Sr., is improving.

Mr. and Mrs. Bob McGeechy and children spent Sunday with Mr. and Mrs. Dave Boden.

The afternoon meeting of the U.F.W.A. will be held on Wednesday, April 4th at the home of Mrs. H. Gottschlich. Roll call to be answered by Aunt Het's sayings. Community singing and papers to be given by Mrs. Barnes and Mrs. Hall. There will be an exchange of flower and garden seeds, also flower slips.

Mr. Joe Schnierer and family are leaving this district and have rented a farm north of Edmonton. We wish them luck.

Mr. F. Tracy and Gordon Flack spent Sunday with Mr. and Mrs. O. S. Young.

Mrs. Burris and Mrs. Bob Gibson are leaving this week for a visit with friends at the Coast.

BAPTIST CHURCH

Special Easter programme and story at Sunday School at 11.

Juniors at 6:15.

Special music and Easter Sermon at 7:30. "What do we know about immortality? Do the dead live again?"

B.Y.P.U. Monday at 8
Group C in charge.

Mrs. W. H. Hunt held a most successful sale of her household goods and will move to the farm of her son Ed., where she will build a new home.

A lady's black hat with white buckle, lost on Lacombe-Alix highway. Finder notify this office.

CHEVROLET ANNOUNCES

CANADA'S LOWEST-PRICED CAR LINE

CHEVROLET — GM — GENERAL MOTORS PRODUCTS

The New 1934 CHEVROLET STANDARD SIXES

DOES the idea of getting real CHEVROLET quality — *at the lowest price for any car in Canada* — appeal to you? Then see the new Chevrolet STANDARD SIX models at our showrooms *today!* They're big and rugged in appearance, *and in fact* —smartly styled in the new windstream manner with Bodies by Fisher. They're wonderful performers — with a generous offering of those famous riding and driving features that make the Master Series Chevrolet the most revolutionary value in the low-price field. And they cost less for gasoline and oil, less for tires, repairs and upkeep than any other car you can buy! Don't all these facts point to this one inescapable conclusion: If you want to *save* on your next car, and at the same time own a car of proved *quality*, you should see the new STANDARD CHEVROLET *first!*

WORLD HAPPENINGS BRIEFLY TOLD

A minimum wage law for men in Manitoba is a possibility this session, according to Premier Bracken.

A further 20 per cent. reduction in automobile insurance rates was announced in Montreal by R. N. Cornish, secretary of the Canadian Automobile Underwriters' association.

Mrs. Saro Jini Naidu presided recently at a meeting of women representing all communities and faith, convened by the Women's Council at Bombay, India.

President Roosevelt, through his secretary of the treasury, asked the United States congress to let him retain a free hand over monetary policies for at least another year.

Renewal of the loan to Manitoba of $1,944,130 which, granted a year ago, will expire on March 14, has been authorized in an order-in-council tabled in the house of commons. The renewal is for six months.

Raising of the educational requirements for nurses taking training courses in Alberta from grade eight to eleven was approved by the Alberta legislature, dealing with an act making this change.

A total of 426,342 pounds of butter was in cold storage March 1 in Winnipeg, as compared with 555,541 at the same time last year, according to a report of the Dominion bureau of statistics.

The government could not state definitely at the moment whether or not a revision of the Dominion Companies act would be made this session, Hon. C. H. Cahan, secretary of state, told the house of commons.

Will Use Hypnotism

College Professor Has Idea It May Aid Education

Knowledge which could not be obtained otherwise without years of study may be acquired in a single semester if education by hypnotism tests to be tried this semester at the College of the City of New York are successful, Dr. Ralph B. Winn said. Ten students will be used in the tests.

"Small gray balls will be suspended before the students' eyes," he said. "Only a few minutes will be required for their eyes to shut automatically. Yet they will not be asleep. They will be in a state of light hypnosis. When I begin to lecture in a slow, even tone, I shall try to evoke vision after vision in the students' minds."

Students will be selected from volunteers of the psychology class.

Required Much Patience

Englishman Works On Inlaid Wood Vase Nine Years

Any sculptor wanting a model for "Patience on a Monument" would do well to ask Fred Day of Leeds, England, to pose for him. Mr. Day has just completed a vase of inlaid wood on which he has been working for nine years. It is only 15 inches high but is made of 10,000 pieces of wood from 80 different species of trees. One panel shows a peacock on a wall with every feather perfect and in the natural colors of wood. Another panel is a spider's web where the strands of inlaid wood are finer than human hairs. Those men who stuff hundreds of pieces of thread into the eye of a little needle are only tyros in patience compared to persistent Fred Day.

Jaywalker: "So many people are struck by motor cars while alighting from trams."

Tramway Official: "Well, yes, but those people have paid their fares. It's this running over people who are waiting to get on that makes me mad."

China's police force will be reorganized by two Berlin chiefs.

SOURED ON THE WORLD?—THAT'S LIVER
Wake up your Liver Bile
—No Calomel necessary
Many people who feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or mucilage which only move the bowels and ignore the liver.
What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Get your stomach and intestines working as they should, once more.
Carter's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. 25c. at all druggists. 21

Fashions

By Ruth Rogers

IMAGINE HOW FASCINATING THIS MODEL IS CARRIED OUT IN THE NEW LOOKING PRINTS

Every woman knows she can't have too many gay little frocks of crepe silk print for spring.

To-day's dress is just as charming as can be for immediate as well as for spring in navy and powder blue print.

And incidentally, it's slimming to the figure, so will suit many ages.

And easy-to-make is one of its star qualities. The bodice is quickly fashioned with its raglan sleeves and draped neckline.

Then again, you might prefer a dress of plain crepe, black, navy, bright red or soft brown shade would prove charming.

Style No. 496 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 3½ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Experiment Was Success

Zoologist Makes Tail Of Tadpole Grow On Salamanders

Success in making frog, tadpole tails grow on the bodies of young salamanders (distant zoological cousins of the frog) was recently reported by Eli D. Godsmith, of Harvard University, to the American Society of Zoologists. The tailbuds were cut off the frog embryos while they were very young, he said, and planted almost anywhere on the salamander larvae. There they grew until the gills of the salamanders began to disappear, a sign of approaching maturity. The tadpole tails then decreased in size and ultimately vanished, just as they do on maturing frogs.

Would Be Useful

Two ministers in neigaboring parishes agreed to "change over" for a Sunday.

Misfortune befell one. With some dismay he announced from the pulpit that his dog had destroyed the notes he had written for his sermon; consequently, his address would be short.

After service the church officer greeted the minister in the vestry with—"Yon's a clever dog you've got. Could you spare a pup for our minister?"

Chinese physicians thousands of years ago treated burns with tea; modern physicians have rediscovered that tannic acid is valuable for burns and scalds.

McGinty—"I've a terrible corn on the bottom of me foot."

Pat—"That's a fine place to have it. Nobody can step on it but you."

Noah and the boys were probably the first fly fishermen. With only two worms aboard, they had to be.

Direct radio service between London and Shanghai, China, has been established.

Business of the British post office department has doubled in 20 years.

Gardening

Starting The Seed Indoors Gives Grower An Early Start

With flowers, variety and continuity of bloom are sought. In making the list care should be taken to secure a preponderance of favorite colors as well as varieties which will assure bloom every month from June until frost. There should be some for scent, some for bouquets, some to brighten up shady corners, and others for window boxes, or tall screens. With a range of colors rivalling the rainbow, with a season of bloom for annuals from May until November and with heights varying from an inch to over six feet, it is not at all difficult to plan a perfect Canadian flower garden.

Too many people are content with one sowing of vegetables. But that custom, fortunately is disappearing. Many vegetables are best planted very early. Spinach, peas, lettuce, and radish, for instance, cannot be put in too early. Just as soon as the soil is fit to work is the time for the first of these. But with the tender stuff like melons, cucumbers, corn, and the started plants there is no rush, as long as there is a possibility of frost. Then, too, it is a big mistake to plant all at one time. Practically everywhere two or three plantings at intervals of ten days of many vegetables can be made and thus the harvest spread over a longer period. With some things, however, and some places this is not possible but the harvest may be extended by using several varieties. This course is best followed with peas. The early planted peas are the best yielders, but by sowing an early variety, a medium sort and a late cropper, though all are planted the same day, there will be a difference of ten days to three weeks in maturity.

With many flowers and vegetables from two to three weeks can be saved if the seed is started indoors. Indeed, in districts where the growing season is rather short certain things must be grown in this way if bloom or maturity is to be guaranteed. Among the flowers are pansies, asters, marigolds, zinnias, petunias, cbamos, larkspur, stocks, and snapdragon, though with the possible exception of the petunia and aster in the warmer sections of the Dominion, good results can also be secured from seed sown in the open ground. With vegetables there are peppers, tomatoes, cabbage, cauliflower, egg plants, Brussell's sprouts, broccoli, celery and head lettuce. Naturally, when sown under glass in March, and set out as well started plants in May, such things are away ahead of seed sown in the open ground after the spring frosts are over.

Migration To Old Country

Said To Be Healthy Sign Of Economic Conditions

Immigrants throughout the world are going back to the "Old Country", the International Labor office at Geneva reported, but said this was a healthy sign of economic conditions.

Migration figures indicate the return to more normal conditions, the report asserted, while the most recent statistics show signs of improvement in different parts of the world.

A Condensed Report

A cub reporter who had had it drilled into him for weeks to be brief, wrote as follows: "While walking down Main St. with a friend this morning, Col. Joe Slocom said: 'I feel that I am going to die.' So he leaned against a telephone post and made good."

FREE TRIAL OFFER OF KRUSCHEN
If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c. package.
This consists of our regular 75c. bottle together with a separate trial bottle sufficient for about one week. Then the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1799). Importers: McGillivray Bros., Ltd., Toronto.

Little Journeys In Science

ELECTRIC FISH
(By Gordon H. Guest, M.A.)

Fish which carry electric charges powerful enough to render their enemies unconscious are found in certain parts of the ocean and in some tropical rivers. These fish are equipped with "electric organs", resembling plates of a battery, which in some cases produce illumination and in others merely give the fish power to give off electric shocks. Luminous fish give off light in various ways. One variety of fish has lights arranged along the sides of its body, giving it the appearance of an ocean liner at night. Another has a lantern suspended before its nose. The light given off is mostly blue and green in color and is said to be very luminous, at times resembling a flame.

The electric eel, one of the most interesting of the electric fish, does not give off light. It has two oppositely charged electrical organs running along its back which produce a continuous current from head to tail, and make the eel capable of giving off powerful electric shocks. In the tropical rivers of Africa are found catfish about three feet in length, which are capable of giving shocks of 450 volts, sufficient to knock a man senseless.

Scientists have not yet discovered exactly how these electric organs function. It was once thought that the illumination was due to the presence of phosphorous, or to substances given off by decaying matter in the sea, but these theories have been entirely disproven. What scientists do know, is that a process is carried on in these electric fish, which man has not been able to duplicate as yet. That is, energy is changed into electricity without producing heat, a feat which has never been accomplished by man.

Radio Singers Use Cellophane

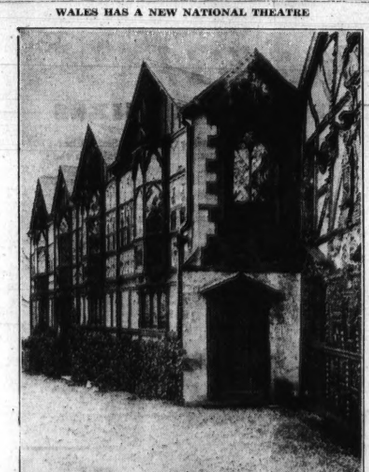

Coloratura Soprano Voice Muted Inside Hood Of Material

Cellophane has now come to the aid of the radio singer. It has always been difficult to get a really good reproduction of a coloratura soprano voice on the radio. Strange things happen to such voices on the air. Then came the idea of muting the voice. A hood of the transparent material was made, in which a singer can stand and sing her highest notes without fear of microphonic vibrations.

Eliminates Monoxide Danger

"Elimination of the danger of motorists losing lives through carbon monoxide gas poisoning from automobiles has been made possible by the use of a chemical vaporizer invented by J. Forbes of Winnipeg," A. C. Emmett, manager director of the Manitoba Motor League, said in Winnipeg. Mr. Emmett stated the invention, patented by Mr. Forbes, made it possible entirely to dissipate the poisonous qualities of fumes from a running gasoline engine.

WALES HAS A NEW NATIONAL THEATRE

The Welsh National Theatre has found a new home at the famous mansion of Plas Newydd of Llangollen in North Wales. As the residence of "The Ladies of Llangollen," the two unconventional ladies who were for many years its tenants, Plas Newydd acquired interesting literary associations. Wordsworth and De Quincey stayed there as guests. It is hoped to hold the inaugural Festival performance on St. David's Day, and to open a Dramatic School in the summer. A general view of the mansion, showing the exquisite carving on the walls and doors.

Robot Pilot "Airworthy"

If Properly Adjusted It Keeps Plane Very Steady

The robot or automatic pilot, which reduced Wiley Post's work of circling the globe to a comparative song, has been found "airworthy" after five months of testing on an airliner flying between Chicago and New York.

One happy finding was that the mechanical pilot produces unusually steady flight when properly adjusted. Passengers on most transport planes find it difficult to drink coffee without spilling it, but on the robot-flown ship a cupful of coffee remained unspilt on a tray for more than five minutes. All sudden movements of the plane were almost checked automatically by the sensitive instrument.

The robot pilot, first announced more than two years ago, will not replace human pilots, it was explained, but it will afford aviators more time to plot their course and receive and transmit weather information.

Another big feature is that the instrument is expected to make bad weather flying more universally possible, as it is designed to eliminate the human element in blind flying.

The device is operated by two gyroscopes which actuate a set of hydraulic valves, which in turn actuate the plane's surface controls.

During the five months of experimentation it was found that the only "bug" apparent in the instrument was a tendency to cause the plane to "yaw" or dip vertically. This can be eliminated by a proper setting of the vertical stabilizer and the robot. Engineers, however, were working to eliminate entirely the "yawing".

New Use For Periscope

Yellowstone Park Ranger Studying Hibernating Habits Of Bears

When spring comes to Yellowstone Park, Wyoming, Frank W. Childs, supervising ranger at Old Faithful ranger station, will know the answers to many questions concerning hibernating bears.

Last fall, when park bears were ready for their long winter's sleep, Childs succeeded in establishing two cubs in "laboratories" equipped with periscopes, listening tubes and thermometers. He is making daily observations of the sleeping, recording the rate of respiration and the body temperature.

Among other scientific facts, Childs hopes to determine whether bears sleep perfectly during hibernation or whether they occasionally move restlessly, perhaps in nightmares. He hopes to know whether they jump promptly out of bed with the coming of spring or whether they take several short "beauty snoozes" before going into the open.

Childs is also observing four adult black bears in their own dens and several marmots, ordinarily called woodchucks.

"I have also located the hibernating den of a grizzly bear," he reported. "But too much curiosity has often been the undoing of some well-organized scheme—and I think I'll let the gentleman sleep in peace."

Had Worrying Job

Chinese Guarded Million Dollar Jade Pagoda Many Months

Chang Wen Ti sailed out of port of Vancouver recently at the end of a worrying vigil. For many months he had been in charge of $1,000,000 in Chinese jade—and during that time had lost but $1,000 worth to New York thieves.

Chang, for 13 years, watched 500 patient Chinese craftsmen handcarve the jade into the form of a pagoda 51 inches high and 13 inches wide.

He saw them fashion and fit the thousands of pieces. He brought the pagoda from China to the Chicago Fair. He watched over it unsleepingly.

The pagoda was taken, by request to New York, the careful Chang never leaving it. But, right from under his eyes, crooks made a haul.

From the pagoda they stole a delicately carved pen rest. It was jade on pink tourmaline and teakwood, valued at $1,000 and small enough to fit into a vest pocket.

"Had the pagoda been smaller they would surely have had it," Chang smiled in praise of American crooks, as he strolled the decks of Empress of Canada. "They are men of skill and artistry."

Based On Christianity

Austrian Constitution Will Derive Authority From God

Chancellor Engelbert Dollfuss states that Autria's new constitution will be based on Christianity, rather than capitalism or Marxism, and will derive its authority from God instead of the people.

Wide powers are granted the executive under the provisions of this constitution, and some persons in informed circles went so far as to predict the possibility of an eventual restoration of the monarchy.

Louis Joseph Vance, novelist, left less than $10,000 when he died December 16.

Some Alaskan bears grow to weigh over 1,200 pounds.

Upholds National Honor

U.S. Paper Praises Canada For Attitude Over Money Matters

All through the months and years when Canada's dollar was below ours, sometimes even twenty cents or more lower, Canada met every obligation to American investors with the equivalent in gold. With the exception of the City of Calgary, in Alberta, neither the Dominion government nor any of its provinces nor a single town or city ever asked for any consideration. If, for instance, a Canadian city had $1,000,000 worth of bonds mature in this country when the Canadian dollar was twenty cents lower than ours, it dug up without a whimper or a word of complaint $1,200,000 of its people's money and paid like men. To-day when the Canadian money is worth more than ours, instead of throwing our dollars back in our faces, they are actually paying their coupons in Canadian funds, so that holders in the United States are getting a premium. What a contrast to the way our own government is treating foreign investors in our bonds! It deliberately flaunts its promise to pay in gold and doesn't do as Canada did, give the equivalent of gold, but instead hands them a dollar worth but sixty cents. We have heard since childhood about the honor of the Anglo-Saxon. But it appears to depend in a great measure on where the Anglo-Saxon lives. Why should it be so much different on one side of the border than on the other? We take off our hats to our Canadian cousins. They have shown us how banks can be run without a depositor losing a cent, and now they are showing us what we once knew—the value of national honor in money transactions.—Malden, Mass., News.

Recipes For This Week

(By Betty Barclay)

BUSY DAY CAKE
(3 eggs)

3 cups sifted cake flour
4 teaspoons double-action baking powder
¼ teaspoon salt
1½ cups sugar
½ cup softened butter or other shortening
3 eggs, well beaten
1¼ cups milk
1 teaspoon vanilla.

Sift flour, once, measure, add baking powder, salt, and sugar, and sift together three times. Add butter. Combine eggs, milk, and vanilla, and add to flour mixture, stirring until all flour is dampened. Then beat vigorously 1 minute. Bake in three greased 9-inch layer pans in moderate oven (35 degrees F.) 25 minutes. Spread Orange Butter Frosting between layers and on top of cake.

MASQUERADE PUDDING

½ cup quick-cooking tapioca
½ cup sugar
¼ teaspoon salt
3½ cups milk, scalded
1 egg yolk, slightly beaten
1 teaspoon vanilla
1 egg white, stiffly beaten.

Add quick-cooking tapioca, sugar, and salt to milk, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Pour small amount of tapioca mixture over egg yolk, stirring vigorously. Return to double boiler and cook until thickened, stirring occasionally. Remove from fire and add flavoring. Fold a small amount into egg white. Add to remaining tapioca mixture and blend. Turn into molds. Chill. Unmold. Serve with Red Cherry Sauce, apricot or prune sauce. Serves 10.

Smiles At The Border

Canadians Find U.S. Immigration Officials Are More Friendly

Commuters from Canada to the United States will wonder what has come over Uncle Sam's immigration officials at border points. At Detroit they have a cherry "Good morning!" for Windsor folk going over to their work. One official in an excess of cordiality, referred smilingly to "our cousins over the river." All the old gruff manner cultivated by the immigration official has disappeared.

Of equal interest is the news that Uncle Sam has ordered it so. Through the proper channels the instruction has filtered down to the man at the gate "to wear a smile and extend the glad hand to visitors from Canada."

Optimists will see in this cordiality at the border a hint that there may be in the mind of Uncle Sam some thought of freer trade with Canada. —Toronto Globe.

Argentina Takes Old Rubber

Have you ever wondered where the old automobile tire casings and inner tubes go? Argentina is seeking rubber scrap from Canada for the manufacture of soles from the rubber for cheap grades of canvas shoes and the remaining portion of the fabric of tires for the manufacture of sleeves for blowout patches, states the industrial Department of the Canadian National Railways. Japan is also a large importer of old tires.

One ounce of butter daily in excess of body needs would normally result in an increase in weight of 25 pounds a year.

Agricultural Notes

Many Items Of Interest To The Western Farmer

For the whole of Canada, the value of all descriptions of farm poultry is estimated at $33,456,000 in 1933, as compared with $34,138,000 in 1932.

At the University of Toronto it was found that irradiated ergosterol was not as effective as cod liver oil in preventing rickets in chickens.

Root development of the Baldwin apple, Montmorency cherry, Elberta peach, Bartlett pear and Italian prune is largely influenced by the character of the soil.

Leaf-wrinkle is a nutritional disorder of the soybean, the injury involving the tips of young leaves which later become much wrinkled on expansion.

According to experiments in Italy, hens fed wholewheat flour laid more fertile eggs than hens fed white flour and the chickens from such eggs were larger and healthier.

Flour which has to be stored for considerable periods in warm, dry rooms, such as are common in steam-heated houses, should be placed in air-tight containers, or practically so.

To prevent young grasshoppers from reaching the surface, farmers in U.S. grasshopper infested areas have been asked to plough grain and flax stubble before May 15.

When fed to young turkeys in various localities of Italy, smaller sized seeds of cereals were better digested than the larger seeds, and resulted in larger gains in weight.

An adequate and well-balanced diet forms an essential part in the treatment of all forms of anemia in human beings, that is, a diet containing fresh red meat, green vegetables, fresh fruit, milk and butter.

Flesh eaters like the coyote, bobcat, and other mammals, and a wide variety of hawks and owls, feed quite regularly on jack rabbit, and under normal conditions help to prevent overpopulation.

In a test covering three summers at Michigan to determine the value of commercial mixtures as compared with farm grains for working horses, it was proved that farm grains were more economical than the commercial mixtures.

The results of six years cross-breeding experiments show that, in the average final weight per lamb, the rankings of lambs out of Rambouillet ewes according to the breed of their sires were Suffolk, Hampshire, Shropshire, Rambouillet, Southdown, and Romney.

Whereas the killing of roots and crowns of apple trees by low temperatures is deemed the major cause of high mortality in apple orchards, there are several contributory factors, such as inadequate nutrition, poor drainage, foliage injury, the time of freezing, nature of the rootstock, and cultural treatments.

How To Work With Fur

Never cut fur with scissors, or it will be spoiled. Turn on the wrong side and cut with either a safety-razor blade or a very sharp knife. When sewing fur, have a small piece of cardboard between the two edges that are being joined. Keep the fur down with this as you sew, and move it along as the work proceeds.

The racing shells used by U. S. college crews cost about $1,500 each and the oars about $20 apiece.

A salmon has been timed to swim 10 yards in a second.

DENICOTEA
CIGARETTE HOLDER
DENICOTEA Cigarette Holder absorbs the nicotine, pyradine, ammonia and resinous and tarry substances found in tobacco smoke.
Complete holder with refills — $1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

A SIMPLE QUICK WAY TO RELIEVE ACID STOMACH

HERE ARE THE SIGNS:

Nervousness	Frequent Headaches
Neuralgia	Feeling of Weakness
Indigestion	Sleeplessness
Loss of Appetite	Mouth Acidity
Nausea	Sour Stomach
	Auto-Intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoonfuls of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed.

OR—Try the new Phillips' Milk of Magnesia Tablets — one tablet for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts *at once* to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine *Phillips'* Milk of Magnesia, or *Phillips'* Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Loretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they wake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Avis is stunned and Camilla's mother likewise. Bowman and Weeks, an advertising agency, where Camilla has submitted some of her work, send for her and tell her they have a new account which requires unusual treatment of juvenile art. To Camilla's surprise she learns that the account is that of her foster father's company, which has decided on an extensive campaign to bolster up lagging business. After a conference with Mr. Bowman, Camilla decides to attempt the work. The critics were enthusiastic about her work, and Mr. Weeks offers her a salary of $50.00 a week to start and a prospect of having it doubled. She goes to keep a dinner engagement with Peter. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household.

(Now Go On With The Story)

CHAPTER XXXIV

Peter was taking the stairs two at a time, intent upon returning to his work for the afternoon when he looked up to see a girl unlocking the door across the hall from his own. So, his new neighbor was a girl. His first intention was to ignore her, but curiosity prompted a second glance, and he found himself face to face with Avis Werth. He had not seen her since the Hoyt party at the club.

"Hello, Peter," she greeted him easily, as if she had been a tenant in Annex Hall for a long time.

"Why — how do you do, Miss Werth?" he could not conceal his surprise. "So you are the new neighbor!"

"Are you sorry?" she laughed at his consternation.

"Of course, not," he hastened to assure her. "What could be more pleasant than a friend for a neighbor? But I'm afraid you won't find me very sociable. I'm so busy these days I can't find time to eat."

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's Vegetable Compound

"Working on your piece for the exhibit," Avis observed with an eager concern. "How does it go? I'm dying to see it, Peter."

He ignored that. "But why the outlay?" he indicated her spacious studio apartment.

She affected a pouting expression. "Is that nice of you? Can't I take art seriously as well as anyone? I took this place because I never can accomplish anything at home. Oceans of room, but no one will take me seriously or respect my privacy, so I came here to work. As for being sociable, I shan't trouble you because I'll be just as busy as you are. So there! Only," her eyes were lowered for a moment and then met his wistfully, "here's an idea—there is one way we both might save some time. I am going to have a maid for mornings and you can run in here for a bite of breakfast or lunch, often. That will save some of your precious time that you can't spare to look up a restaurant." Her tone was practical and casual, as if she were readjusting the computation of time by the calendar and clock, to accommodate him, and yet doing nothing unusual.

He laughed tolerantly. "I'm afraid it wouldn't work out that way. We'd get to talking and take two hours out instead of a few minutes. Thanks, though, for your neighborly thoughtfulness." He was unlocking his door, but Avis made no movement to enter her own rooms. He pushed his door open and she sauntered across the hall.

"Just let me have one peek, Peter," her voice cajoled. "I'll not say a word to anyone about your work. Besides, I want to see your rooms. I only had a glimpse of them once before."

"There's only one," he replied shortly. "Nothing to see, but come in if you wish. You know, art is more than an effect with me — it's my work."

They were in the room now. He left the door standing open. "Oh, it's beautiful!" Avis exclaimed. She moved over to the clay figure on the turnstand and stood gazing at it with genuine admiration. Finally, she said softly, "Peter, it's marvelous. The prize is already yours."

He laughed a confused denial of her praise, pleased nevertheless.

"It's rather good, I guess, but I'm not thinking of the prize. Now that it is almost finished, I am much more interested in the work itself. I think I might be able to sell it for a pretty good price if I do it in marble, in flesh tones, perhaps." He was gazing at the figure with a fond and critical eye, as a parent regards his flesh and blood child. Avis might not have been present, for all he was noticing her or thinking about her.

She glanced around the room for something to detract his attention from the clay figure on the stand. Her eye glimpsed a group of framed etchings on the wall. "What beautiful etchings! You did those, too, Peter? You're a genius!"

"No, Camilla did those. They are marvelous. I admired them, so she gave them to me." Rage seized Avis for a moment. She had drawn his attention from a clay figure, only to concentrate it upon Camilla. She managed to ask calmly, "Does she come here to see you often?"

"Not as often as I wish she would. But Camilla won't interfere with my work, she declares. So I have to be grateful for that. She's a good little sport. When a thing has to be done, she believes in doing it right. It has first place until it is finished."

Camilla, Camilla, she thought, does he never talk nor think of anything except Camilla and work? She feigned an incredulous surprise at his remark, "I should think nothing would take the first place from a husband." She shrugged. "But, then, all people aren't alike. Love and marriage mean so little to some girls. No wonder men can't understand them. They don't all know that a man needs lots of love and sympathy and comforting to make him happy and keep him so," she observed wisely and with a tone of regret for all the wrecked marriages of such negligent wives.

"What do you know about it?" Peter only seemed to be amused. He did not attempt to defend Camilla.

"Some women are wives by instinct. They don't have to be married to understand men," she still maintained that sober, impersonal air of rare wisdom. Then she roused suddenly and said brightly, "But you haven't seen my place. It is just finished and I'm rather proud of it," modestly. "Please tell me if it looks right." She had caught his hand as if to lead him across the hall.

Peter drew away. "I'm sorry. I'll have to endure the suspense of waiting until later to see your place. My model will be here any minute and I've got to get to work. I told you I can't be a good neighbor, even."

"Then do come over this evening," she urged hospitably. "Any time you have a minute to relax, drop in. You can't work every minute."

"But I might interrupt your work. I thought you came here for seclusion," he reminded her.

Avis lifted her hands eloquently. "One hour every day without an interruption would seem like a century to me. I can't go into seclusion all of a sudden. Besides, even if I do want to work, I can't take it that seriously. I expect to throw a lot of parties—studio stuff, you know. I'm giving a housewarming soon and you will have to take time out to be there, don't you forget. You and Camilla," she added as an afterthought.

There were footsteps outside, tap-tapping on the stairs and along the hall, and presently Sylvia stood in the doorway. "Hello," she said briefly, after a glance at Avis without recognition.

"Here she is!" Peter exclaimed with obvious relief. "My model, Miss Todd. Miss Werth. You may be needing a good model yourself. New prospect," he advised Sylvia, already busy with arranging his materials.

"Perhaps I can use you sometime," Avis told Sylvia with a patronizing air. "Well, then, I'll run along and let you two get to work. Bye, Peter," she smiled friendly, and sauntered out.

"The new neighbor turned out to be an old friend," Peter explained casually.

"That's nice," observed Sylvia.

"I don't know that it is so nice," he contradicted. "There is no worse nuisance in the world for a serious artist than a make-believe one who doesn't have to work, but maintains a studio just for effect and a place to entertain. It would be just my luck to get such a neighbor when I am the busiest. I'm afraid she's going to be a pest."

"You don't sound very crazy about her," Sylvia ventured carelessly.

"She's nothing to me," Peter shrugged. "I said she was a friend. She isn't even that—merely a acquaintance. One of the class at National. It's all the same to me if I never see her again. Fact is, I always made it a point to steer clear of her when I could. Now she lives across the hall and suggests that I run in to have tea with her," he grimaced.

Sylvia laughed with genuine amusement, knowing more about the situation than he was aware. Almost, she was tempted to warn him of Avis' intentions, for her sympathies really were with Peter. But her youthfully acquired sophistication maintained that any man could take care of himself. The chances were ninety-nine to one that any woman got the worst of an affair with any man. This happened to be a rare case in which she wished the man luck, chiefly because he was not the aggressor.

Peter's prognostications proved correct about Avis becoming a nuisance. It was only the second day after their first meeting in the hall, when he had made no attempt to respond to her hospitable suggestion to drop in any minute, that she knocked on his door about noon, and to his curt "Come in," opened it with a cherry, "Good morning neighbor. What! at work so early in the morning. Then I guessed it right—you are hungry. I just ran across to invite you over to lunch-breakfast. Tilly has made hot biscuits that will melt in your mouth. Not a man living could resist that!"

She was gayly provocative and informal in scarlet satin pajamas embroidered with gold dragons and Oriental characters that no Oriental ever would have recognized or deciphered. But they added their touch of subtle charm and mystery. Her long, narrowly plucked eyebrows that slanted downward at her temples contributed to that effect.

If one analyzed her features according to relation and measurement, Avis was not beautiful, but there was a striking sophistication and allure about her that were a combination of beauty culture, the confidence of wealth and a selfish assumption that whatever she desired was hers.

Peter rubbed the clay from his fingers, irresolutely

(To Be Continued)

Laws Among Savage Tribes

Caribs Have Different Language For Men And Women

Among the Bechuanas the men plough, and it is tabu for a woman to touch the cattle. The women of old Nicaragua had the monopoly of shopping; if a man interfered he was thrashed. The Eskimo considers it a scandalous thing for a man to interweave with or perform work belonging to women. The segregation of the sexes goes so far in many cases that each sex has practically a different language. According to the Zulu Llonipa laws a woman may not call her husband by his name. She must say "father of so and so." She may not use words similar to the name; consequently the women have invented synonyms. The Caribs have two distinct vocabularies—one used by men and by women when speaking to each other, and by men when repeating some saying of the women.

Eat More Bread

"If everybody will eat three extra slices of bread at every meal, it will save the country from a disastrous overproduction of wheat," Dean Clark, secretary of the Society of Elevator Superintendents and Operators of North America, said at a convention in New York. Such a policy, he said, will increase wheat consumption 100,000,000 bushels a year.

Passengers of a cruising liner which recently visited Juan Fernandez, "Robinson Crusoe Island", spent enough while there to help the islanders through the winter.

CHILDRENS COLDS

PROVED BY 2 GENERATIONS

Art Of The Magician

Million Mysteries Evolved Behind Doors Of Members' Club

A million mysteries are thought out behind the impenetrable doors of the Magicians' Club, the members of which have just revealed some of their very latest wonders at their annual dinner. At the risk of being turned into a rabbit, a Press Association reporter called on the founder, Mr. Will Goldston. "To-day the public know too much," Mr. Goldston confessed. "The old days of the double mirror, the 'ghost' and the stage traps are gone. People sit down and say, 'now deceive me—if you can', so the magician must always know a little more than his audience." What of the girls who appear and disappear so strongely in the cabinets of the conjurors. Do they have to be trained? "Those girls," said Mr. Goldston, "must be acrobats and benders. They must be able to fold themselves up in a very small space. Yes, they look substantial, because their clothes contain hidden springs, and when they stand up they expand. People say: 'How could that fat girl have come out of that little box?' But she is really not so substantial as she seems. Yes, there are a few women members of the Magicians' Club, but none has passed our three star or highest degree in magic. Women magicians talk nicely, look nice and are very graceful and charming, but as a rule they are not good at 'misdirection'." "What is misdirection?" Mr. Goldston for a reply took a penny, did some magic passing, in which it appeared to go from one hand to the other, and then asked: "Which hand is it in?" Well it wasn't. It was neatly lodged a little way down his neck. "That sort of thing is misdirection," said Mr. Goldston, "and women are not good at it. Every magician must learn to be a pick-pocket, too, and before you can be a three star man you must pick the pocket of our president. Goodbye. By the way is this your wallet?" It was.

Six Rules To Follow

If your room is too small, you can make it look larger by:

1. Choosing light wall colors, such as cream, primrose, pale blue, and certain shades of very pale green.

2. Using glossy wall treatments, such as varnish over distemper, or a new wax paint that dries with a glossy surface.

3. If having wall-paper, selecting one of indefinite pattern in subdued shades.

4. Painting the wood work the same color as the walls, or one tone deeper.

5. Keeping to plain colors for curtain and covers.

6. Having only essential pieces of furniture of simple line and a few carefully hung pictures of modern size. A well-placed mirror gives space and life to a small room, and wall or table lamps are better than a centre light.

New Bird Discovered

Pugnacious Midget Is No Bigger Than Good-Sized Bee

A bird no bigger than a good-sized bee, found in the Haitian highlands, is described in a new publication just issued by Dr. Alexander Wetmore, assistant secretary of the Smithsonian Institution. It is known as the Hispaniolan verian humming bird. In spite of its tininess it is quite pugnacious as indeed most humming birds are, and does not hesitate to dart to the attack of birds as big as a mocking bird if it objects to their presence.—Science.

Another profession that seems to have disappeared during the last four years is that of efficiency expert.

Etiquette In China

Even The Coolies Address Each Other Politely

The Chinese have an elaborate system of etiquette which is punctiliously observed, writes a correspondent in the Johannesburg Sunday Times. The suavity of manner with which even coolies address one another is most notable, while the graciousness with which the boat-women accost each other is very pleasant to hear.

With commendable common sense, they allow a burden-bearer the right of way, for the unencumbered can easily step aside. One man carrying a load will step out of the way of two men carrying a sedan chair.

On entering a room in which these are a number of persons, a Chinaman does not speak or bow to each one separately; he will bow first to the right, then to the left. It is unpardonable to sit down before a guest is seated, and if the visitor gets up or rises slightly, the host must rise at the same time.

It is not polite to ask for money due you when you meet your debtor in the street. The way to request payment is to ask the man for a loan. It is very impolite to wear spectacles in the presence of a guest, or a superior. A short-sighted man will submit to any inconvenience rather than infringe this rule. It is ludicrous to see a witness in a court of justice looking at a document he is unable to see properly, yet not daring to put on his glasses lest it be construed to mean disrespect to the judge.

After each meal, it is the custom to wipe the face and hands with a cloth wrung out of hot water. In the family circle, each one will leave the table to perform this rite; but at a formal dinner party, the servants bring in a cloth for each person. In the Soochow district of China, however, the same cloth and basin are used by all to show that the folk present are brotherly!

THE RHYMING OPTIMIST

By Aline Michaelis

THE SPELL

The driving rain has ceased with dusk.
The sky
Is leaden-hued as day slips into night;
No bloom in all the scene to catch the eye,
Same slim flame-flowers, scarlet flamed and white
That in the glowing hearthfire leap and start,
In such an hour at a dull day's close
A name denied my lips stirs in my heart,
And suddenly the world is touched with rose!

The old enchantment weaves its starry spell
In seasons when my spirit is most sore;
A dear, unspoken name and all is well,
A name with power to wake the past once more.
In moment that would else be wholly drear,
A name which brings your fragrant presence near!

Ancients Were Clever

Made Use Of Many Methods We Consider Fairly New

Indians in Central America used anaesthetics before Columbus made his voyage of discovery, and were acquainted with the fundamentals of mathematics long before white men learned them, according to Mr. Gregory Mason, American explorer and archaeologist. "How many Americans realize," Mr. Mason asked, "that the Toltecs built a pyramid three times as great in bulk as the largest in Egypt, and that the Peruvians made tapestries finer than any of Europe, and that the Mayans invented zero 600 years before the Hindus—which means that the Mayans were able to multiply and divide 1,000 years before Europeans could. The red-skinned natives of Yucatan, were better astronomers than the Europeans, and had a calendar far more accurate than the one Columbus was using and in some ways even superior to the one we use to-day."

Canadian Hay In Britain

On the point of quality there seems to be no doubt that Canadian hay of good clover mixtures is the most acceptable on the United Kingdom market, says the Canadian trade commissioner. There is apparently some possibility that a demand for Canadian hay will develop in the United Kingdom about April or May this year.

Has Everything Needed

As a Negro physician, Dr. G. J. Mills, of Knoxville, Tennessee, brings folks into the world. As a real estate owner he rents them houses. As a doctor he can treat them if they become ill. As an undertaker he can arrange their funerals. Also the doctor can put the final touches to life and death. He owns a cemetery.

The radio has a great advantage over the political meeting in that the smallness of the audience can't influence the speaker's enthusiasm.

Brazilian coffee growers in 1933 destroyed 918,065 tons of coffee and brought the total destroyed since July, 1931, to 1,716,000 tons.

Medical Insurance Plan

Alberta Commission Investigates Possibilities of State Medical Service

An ultimate $10,608,000 municipalized medical insurance scheme for the province is recommended in a report tabled in the Alberta legislature by a commission named in 1932 to investigate the possibilities of a general medical insurance plan.

For frontier districts the commission recommends a state subsidized doctor who would be assisted by a nurse. In some of these sections a nurse might suffice, the report says, with a travelling clinic available for minor surgery.

The body also reported that it is "of the opinion that the existing schedules of fees for surgical and specialized services is too high."

For the present the commission recommends an expansion of the Alberta public health programme, more especially in the control of tuberculosis, extension of public health nursing service, and a re-establishment of a travelling clinic service for those parts of the provinces where a similar service is not provided.

It also recommends that the minister of health be given statutory authority to constitute areas as full-time health districts, and to determine what proportion of the cost of administration shall be borne locally and what share by the province.

Improving The Zinnia

New Variety Rivals Dahlia In Size And Color Range

The old-fashioned zinnia, that our grandmothers grew as "Youth and Old Age" are becoming more outstanding every year as improvements are made and new strains introduced. The new Giants of California are rivalling the dahlias in size and color range. Garden makers should plant plenty of them. Don't overlook the Lilliputs, either. They are splendid for edging material or for the front of a bed containing the taller-growing varieties. The new Tom Thumb zinnias are very colorful and provide an abundance of bloom over a long period.

For those who are seeking novelty in zinnia strains, trials of the new scabious-flowered and the cactus-flowered variety called "Achievement" are recommended. The scabious-flowered is a distinct break in type, being not unlike the new double-crested cosmos in appearance.

Soil For Apple Trees

Soil requirements are very different for apple trees in the East and in the West of Canada. While Eastern orchardists desire gravelly subsoil to facilitate drainage, Western growers desire a deep sub-soil moderately heavy and retentive of moisture. Where Eastern growers desire to drain off excess water, Western growers attempt to conserve it.

Britain's mail, during the year ended last March, totalled 6,640,000,000 letters and other packets.

It isn't necessary for a man to have pull if he has enough push.

Little Helps For This Week

"Beloved, think it not strange concerning the fiery trial which is to try you, as though some strange thing happened unto you, but rejoice inasmuch as you are partakers of Christ's sufferings." 1 Peter 4:12-13.

We take with solemn thankfulness
Our burden up, nor ask it less,
And count it joy that even we
May suffer, serve, or wait for Thee,
Whose will be done.
—J. G. Whittier.

Receive every inward and outward trouble, every disapointment, temptation, darkness and desolation with both thy hands as a true opportunity and blessed occasion of dying to self, and entering into a fuller fellowship with thy self-denying, suffering Saviour. Look at no inward or outward trouble with any other thought, and then every kind of trial and distress will become the blessed day of thy prosperity. That state is best which exercises the highest faith in, and fullest resignation to God.—Wm. Law.

Disposal Of Canadian Exhibit

Italian Experiment Station Bought Poultry Shown At World Congress

Mr. F. C. Elford, Dominion poultry husbandman and past-president of the World's Poultry Congress, has just received, through the efforts of the Canadian trade commissioner at Milan, Mr. Muddiman, a report on the disposal of the Canadian birds that were exhibited at the Congress in Rome last summer. Most of the birds went to the Italian Experiment Station, and it is of interest also to know that Prof. Ghigi, who was the general director of the Congress, selected Canadian birds for their own government work. Prof. Ghigi took home a number of breeding pens of Barred Rocks and White Leghorns, from Canada at the time of the 1927 Congress.

The Threepenny-Bit

Appeal For Small Coin Contributions Netted Missions $28,000

The threepenny-bit, that tiny silver coin corresponding to the Canadian nickel, but of a cent more in value in normal currency, has saved the foreign mission work of the Church of Scotland, according to Rev. J. Miller Graham, convener of the Foreign Mission committee of Dunfermline and Kinross. The situation in regard to this branch of the church's work, said Mr. Graham, was saved by the ingenuity of the Moderator of the Church, who sent out an appeal for threepenny-bit collections. That appeal brought him about $28,000.

The precise length of the solar year is 11 minutes less than 365¼ days.

The "country weekly" depends on job printing to add to income from circulation and advertising.

How to Stop a Cold

Quick as You Caught It

Take 2 Aspirin Tablets. Drink full glass of water. Repeat treatment in 4 hours. If throat is sore, crush and dissolve 3 Aspirin Tablets in a half glass of water and gargle according to directions in box.

Almost Instant Relief in This Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICKEST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets. Aspirin is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve almost instantly. And thus work almost instantly when you take them. And for a gargle, Aspirin Tablets dissolve so completely, they leave no irritating particles. Get a box of 12 tablets or bottle of 24 or 100 at any druggstore.

Does Not Harm the Heart

The Lord Lascelles Chapter of the I.O.D.E. will hold a bridge party in the Empress Hotel, Friday evening, April 6.

Here and There

A. C. Leighton, R.B.A., president of the Government Art College at Calgary, will again hold his summer art school for selected art students from the province of Alberta at the Kananaskis Dude Ranch near Banff, Alta. Mr. Leighton, who is a grand nephew of the late Lord Leighton, president of the British Academy from 1878 to 1896, has been painting for years at Banff and through the Canadian Rockies. He is also head of the Institute of Technology and Art in connection with the University of Alberta. The Kananiskis Dude Ranch operated by Mrs. Bill Brewster, is well known throughout Canada and the United States, and is surrounded by the most magnificent of Canadian Rocky Mountain scenery.

Governor Frank Murphy, of the Philippine Islands, was the guest of Commodore R. G. Latta, of the Canadian Pacific liner Empress of Britain, at Manila on March 15. Governor Murphy inspected the liner, which is engaged on her annual Round the World cruise, and wished Commodore Latta and his ship many happy returns to Manila.

Captain Cyril D. Neroutsos, for many years Manager of the British Columbia Coast Boat Steamship service of the Canadian Pacific Railway, relinquishes his duties on April 1st under the provisions of the Company's retirement regulations. He is succeeded by Captain R. W. McMurray, formerly Marine Superintendent at Vancouver.

Three cruises to the Norwegian fjords and the Land of the Midnight Sun will be made by the Empress of Australia this summer. The first cruise, of 14 days, leaves Southampton June 29, the second from London July 14, for a 19 day trip as far north as Hammerfest, North Cape and Spitzbergen, and the third from Immingham, 12 days, to the fjords and Oslo and Copenhagen. Connecting sailings from Canada for the three cruises are the Empress of Australia from Quebec June 21, the Duchess of Atholl from Montreal July 6, and the Duchess of York from Montreal July 20.

Your favorite picture stars, from Greta Garbo to Betty Boop will be seen as well as heard aboard the "Duchess" liners, as well as the "Empresses" of the Canadian Pacific this summer. The Duchess of Bedford and Duchess of York are already equipped with talking picture machines and the Duchess of Atholl and Duchess of Richmond will have them for their first voyages this summer. The Empress of Britain and Empress of Australia have been showing talkies for some time now.

The Easter holidays, commencing March 29 and extending to April 3rd, offer an exceptional opportunity for travel. The Canadian Pacific Railway is making generous fare concessions and indications are that extensive travel programmes will be carried out by Canadians and visitors to the Dominion.

A large party of Holy Year pilgrims from the Maritime Provinces sailed from Halifax recently in the Canadian Pacific liner Montclare. On Easter Eve they will be received in audience by the Pope. They will visit London, Paris, Milan, Assisi and other cities in Europe before returning to Canada at the end of April.

The Baptist Ladies' Aid are holding a Tea and Sale of baking in the Oddfellow's Hall on Saturday, March 31st.

CHOICE TABLE POTATOES

No. 1 Table Potatoes 60c. per bushel. Fresh Turnips, pitted outsale, 1½c. per pound. Matt Bergin.

IOWALTA NEWS

There will be a card party and pie social on Wednesday evening, April 4 at the school. Cards to be played from 9 o'clock followed by pie and sandwiches and coffee for supper. This will be the last card party this season and credit is due to the people that have made these such a success all winter.

We wish Mrs. Lord good luck on her trip to B.C.

Several attended the dance at Wolfville, Friday last and report a real good time.

Mrs. Pragg and Mrs. Marquardt visited Mrs. Zielke on Wednesday afternoon.

Mr. and Mrs. Cecil Whitecotton have returned home after spending the winter with their parents in B.C. After all Sunny Alberta looks good.

Mrs. Oren Rourke spent Friday with Mrs. Key.

Chester Kasha was seen in our part of the country this week end—what's the attraction, Chester?

Howard Smith spent Saturday with his cousin's Lyle and Arthur Perkins at the Bradley saw mill.

The card party at the School was a real success on Friday last. Mr. and Mrs. Willis Henderson acted as hosts.

10:00 a.m. Sunday School.

10:30 a.m. Special Service, Holy Communion and Sermon.

7:30 p.m. Special service and Sermon.

There will be special music at all Services.

OAKIE-SKEETS TEAMED AGAIN IN FILMUSICAL

Jack Oakie and Skeets Gallagher are reunited once more as the foremost comedy team of the films in Paramounts big musical comedy "Too much Harmony," at the Avalon Theatre this week.

They were acclaimed throughout the country a few years ago after scoring an outstanding success in Paramount's "Close Harmony."

In "Too Much Harmony," they play a pair of dumb vaudevillians, once a great pair of low comics who have since gone high-brow to their own ruination. In their act is Judith Allen.

Bing Crosby, star of a Broadway show, steps off in the small town in which they are playing, catches a glimpse of the act and offers to take them to New York in order to give the girl a chance. He falls in love with her, but when he gets to New York finds that she's engaged to Jack Oakie. Crosby has a fiancee of his own, Lilyan Tashman, a gold-grabbing blonde. She and Oakie are ready to tear the roof off when they learn of the attachment between Crosby and Miss Allen.

And the Broadway show in which all are star has much "too little harmony" until Oakie and Gallagher put their "bright" minds to work to solve the problem.

Arthur Johnston and Sam Croslow have written eight new tunes for the picture, including "Thanks," "Buckin' the Wind", "Cradle Me with a Hot-Cha Lullaby," "Black Moonlight," "Boo-Boo-Boo", "The Day You Came Along," "The Two Aristocrats," and "I Guess It Had to be That Way."

COMING: Monday, Tuesday and Wednesday, April 2, 3 and 4.

"I Was A Spy" starring Herbert Marshall, Madelaine Carroll and Conrad Veldt. This is said to be one of the best English pictures to date.

Janet Gaynor and Warner Baxter, in "Paddy the Next Best Thing,"

WHY THE VENDETTA?

Tradition dies hard. It seems very hard for Liberals and Conservatives up at Edmonton to cure themselves of the idea that they are separate parties sworn to everlasting enmity. Yet while Conservative members and Liberal members lose no opportunity on the floor of the Legislature to exchange their little unpleasantnesses when opportunity offers it all seems like so much shadow boxing, and if you were to ask a Conservative what his quarrel with the Liberal party really was or a Liberal his grounds for disagreement with the Conservatives it would be hard to get an answer so far as provincial policies are concerned. You would probably be told, could you find a member frank enough to tell you, that there always were Liberals and there wer always Conservatives and there will be and that, you would be told, is that.

It is not a very substantial reason for continuing traditional jealousies between two parties which in provincial affairs have so much in common and so few differences. Pride of party? Yes, an excellent thing, of course. But in these critical days when our institutions are threatened by groups identified by various labels, preaching fantastic political doctrines, is the safety of the body politic not a greater thing than the party spirit? Let us have our Liberals and our Conservatives in national affairs where there really is a dividing line, but to carry on the old vendetta in provincial politics is sheer folly when one considers how much there is to be gained by sinking differences for the common good.

BENTLEY JUNIORS START GRAIN CLUB

Bentley, March 28—A Junior Grain club was formed here last Saturday at a meeting in the office of the Pool Elevator, F. H. Hunter presiding.

Officers were elected as follows: president, Joseph S. Solberg, Sunset district; vice-president, Donald Surrat, Bentley; secretary, Oliver Hicks, Outlet district; seed supply officer, F. H. Hunter; club leader, Cecil Sargeit. On the initial enrolment were the names of 17 young men. The variety of wheat selected for the club's purposes was Reward.

It was as the result of an address here the week previous by C. Holman, assistant to E. L. Gray, field crops commissioner, Edmonton, that this forward movement was put into effect.

ANTIQUES, ART AND HANDCRAFTS EXHIBITS TO BE HELD AT RED DEER

The Red Deer ladies who visited the Lacombe Exhibit of Antiques, Art and Handicrafts were so delighted with the Exhibit and so greatly surprised that one Western District could get together such a wealth of interesting and beautiful exhibits, that they decided to see what Red Deer could do in that line.

Red Deer Exhibit will be held in the United Church, Red Deer, Saturday, March 31, from 10 a.m. to 6 p.m. There will be something of interest to all; Antiques from the first Christian era, perhaps 1600 years old; a collection of Indian relics considered the best in Western Canada; Handicrafts from almost every land.

CLIVE HELPS HALL FUND

Clive, March 28—The annual rummage auction sale held by the Clive community hall committee on Saturday was a decided success although the weather was disagreeably cold.

The sale was conducted by C. F. Damron of Bentley, who contributed his services as auctioneer.

The list of articles and stock donated was large and bidding was brisk in the majority of offerings. The net proceeds of the sale amounted to $250 which will be a decided reduction in the amount of the debt on the hall.

CARD OF THANKS

We wish to thank all those friends who so kindly rendered assistance and extended sympathy during the illness and since the death of our beloved father. We wish to especially thank Dr. Henry and the staff of the Bentley Hospital for many kindnesses and Mr. and Mrs. Woody for the music supplied at the funeral service, and also those who sent the beautiful floral tokens of regret.

Mr. and Mrs. Read,
Mr. and Mrs. O. E. Larsen.
Blackfalds, March 26.

Mr. and Mrs. J. E. Richardson and Son, of Los Angeles, are spending a short holiday in Lacombe, the guests of Mr. and Mrs. Chas. Hembury. Mrs. Richardson is a sister of Chas. Hembury. Mr. Richardson is passenger agent for the Southern Pacific Railway.

During the past few weeks two good dogs, owned by residents of Lacombe, were needlessly done away with. The first was the little dog owned by Mario Bouyea. Everybody in town knew and liked little 'Peter', and she will be missed by all. The little dog was set on by two big dogs, on main street and was killed.

The other was the beautiful Spitz dog owned by D. F. Chisholm. 'Nipper' was well known to the residents of town, and was not in any way a nuisance. 'Nipper' was poisoned, and everyone is at a loss to know the reason. We sincerely hope that the poisoner is apprehended before other good dogs are destoyed.

FOR SALE CHEAP

"SALADA" TEA

"Fresh from the Gardens"

The World's Great Handicap

In an address delivered recently at Watrous, Sask., Professor Swanson of the University of Saskatchewan, said he could see signs on the horizon of a return to economic sanity, but "fear is in the way". He said: "International fear, political fear, biological fear, fear of Japan, economic fear. Life is overshadowed and overclouded with fear. The time has now arrived," he added, "to take place of leadership in our country, in overcoming these fears. On the Western plains there is no place for this fear."

Then in the United States we have Bruce Barton, one of the most observant and sanest writers of the day, pointing out that the economists seem pretty well agreed that the bottom of the depression has been reached and passed and that business is fundamentally better all over the world, while of his own country he says it is now in the position of a sick man on his way back to health; that while a great many medicines are being applied, some of which probably help the patient's recovery and some of which hurt, the important fact is that health is returning, and that the country can stand a considerable dose of patent medicines without permanent harm, and that when the country is really healthy it will throw the patent medicine bottles out of the window, discharge the most radical doctors, and go on its way.

Bruce Barton, however, points to two very important things for people to remember and heed. It is, he says, vitally important to keep an open mind. Things never again are going to be the same as they were; on the other hand, they are not going to be so entirely different as some enthusiastic people would have us believe. It is, he says, no use sighing for the return of the good old days; it is even less useful to assume that all the past was bad and must be discarded. His advice is: "Keep moderate; keep flexible."

Most important, says Bruce Barton, "fight all fear", and he urges that the words of Thoreau be placed where they can be seen every day: "Nothing is so much to be feared as fear. The sin that God hates is fear; He thinks atheism innocent in comparison."

It is undeniably true that fear is the great obstacle to a return to more normal conditions throughout the world. It is fear that prevents disarmament and continues to impose upon the taxpayers of the nations the crushing burden of huge armies, navies, air fleets, and the whole complicated paraphernalia of war establishments. It is fear that leads nations to erect hostile tariffs against the goods and products of other nations. It is fear that is keeping untold millions of money locked up instead of it coursing through all the channels of business and providing work and wages for countless thousands at present unemployed. It is fear that is distorting the minds of people and making them the easy victims of others who preach the gospel of discontent and despair.

Fear never makes for progress. Being destructive of constructive thought and initiative, it acts as a brake on progress, preventing the launching of new enterprises, discouraging expansion and further developments. Through the engendering of timidity and lack of self-confidence, fear leads man to withdraw into himself and behind isolation protective devices wherein he cowers but does nothing else. In a word, fear makes him a coward with a coward's outlook on life and its responsibilities.

It is the future of which most people appear to be fearful. They decline to recognize and accept the lessons and experiences of the past as having any bearing upon or offering any guide for the problems and experiences of the present. Instead, in their fear, they say present difficulties are different from anything ever before known, and consequently neither thy nor any other person or persons know what to do or what ought to be done.

So, in their fear, they will not take actions which would not only accomplish something but would inspire others to action, and the cumulative effect of which would be a solving of difficulties. Work would be provided for hundreds and thousands of people now idle if others having some reserves would take their courage in their hands and proceed to have this, that or the other little job done which demands attention. But, no, they will not venture even a small expenditure and thus they retard progress and help to perpetuate a condition of things which, if continued, will mean their own ruin.

Wise parents seek to overcome fear on the part of their children. They do it judiciously but persistently because they realize that the obsession of fear is the greatest possible handicap in life. Wise leaders of the Canadian people in all walks of life should join forces in waging war on fear which now possesses so many, and they should join battle with those who are engaged in capitalizing fear as an agency in the advancement of feelings of economic despair.

Saskatchewan Homesteads

Special Consideration To Be Given To Veterans Of The Great War

Granting special rebates to veterans of the Great War who served in an actual theatre of war, but also applying to all purchasers to the extent that free homesteads are practically obtainable again in Saskatchewan, new land regulations, retroactive to 1929, will shortly be announced by the government. Under the new regulations all provincial lands for sale will be advertised without classification. Interest charges for 1933 and 1934 have already been forgiven and if conditions warrant, no interest will be charged in 1935. But, in any event, the rate will be cut too five per cent. Several thousand buyers will benefit.

A "Gold" Copper

Looking over some coppers received in change, Mrs. D. H. Mallory, of Brockville, Ont., noticed one was more discolored than the others. Curious, she rubbed it clean. It was an English gold coin, dated 1797, the value of which has not yet been learned.

There are about four and a quarter million persons in the United States who cannot read or write in any language.

A factory at Stron, Maine, turns out approximately 50,000,000 toothpicks daily.

Alberta's Greenhouses

Value Of Sales In 1931 Was Placed At $800,000

Though Alberta is thought of by most people as a country of wheat it has considerable space devoted to greenhouses. Alberta leads the other prairie provinces in this respect. The figures recently released at Ottawa show that in 1931 the province had some 642,000 square feet under glass in greenhouses not on farms, and in addition some 526,000 square feet under glass on farms. The value of the business done from these greenhouses in sale of flowers, flowering plants, vegetables and vegetable plants was placed at approximately $800,000. These figures indicate that the greenhouse business in this province is a fairly substantial one.

Made Splendid Decoy

Ben pointed out to his friend, a taxi-driver, that there was a purse lying on the floor of his cab.

"Yes," said the driver, "when business is bad I put it there and leave the door open. It's empty, but you've no idea how many people jump in for a short ride when they see it."

Britain looks at America's budget and cries: Cheerio, old dear, pretty soon you'll have an income tax like ours.

Fatal cases of influenza in England numbered much less in 1933 than in 1932.

Household Drudgery

The Bane of a Woman's Life

MILBURN'S HEALTH AND NERVE PILLS

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. Is it any wonder she becomes nervous and irritable, has hot flushes, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

Act May Be Revised

Amendment Of Canadian Constitution Is Now Under Consideration

Revision of the Canadian Constitution to bring it into harmony with present-day conditions is under consideration by the federal authorities.

Tremendous changes in the business and social life of the Dominion have occurred since the British North America Act was drafted and while Sir John A. Macdonald and the other Fathers of Confederation are rated among the greatest statesmen the country has produced, it is now recognized they could not foresee all the developments of the last half century or more.

There are many ways in which the federal and provincial jurisdictions apparently clash, including radio, aviation, insurance, companies acts and other matters which were not contemplated when the B.N.A. Act was framed.

Amending the constitution, if it comes, will be brought about by an address of both Houses of the Parliament of Canada to the Parliament of the United Kingdom. Consent of the provinces is not absolutely necessary, but the government of Canada would hesitate to seek changes without the consent of the provinces.

Revision of the constitution would be a task requiring considerable study, and it is suggested here that the matter might very well be referred to a special committee of the senate, which is singularly well equipped with legal talent.

Answering Hurry Call

Firemen Were On Their Way But Forgot Address

From a member of the faculty of Sarah Lawrence College in Bronxville we have heard about the shock a Scarsdale family had one night about a quarter past eleven. Mummie and Daddy and the kiddies had all gone to bed when they heard the screeching and rumbling of fire-engines. The husband just turned over in bed, but the wife got up and went to the window. She saw three or four fire-engines standing practically at her curb, puffing and churring. And suddenly her doorbell rang. Shouting at her husband (who still didn't get up), she threw something about her shoulders and went down and opened the door. "Can I use your phone, lady?" asked a big fireman standing there. "Yes," she said. "Where's the fire?" "Gotta find out," he said, brushing past her. "We all forgetta address."—The New Yorker.

Wingless Rooster In Smithsonian Institute

Only Case Known To Science Where Such Birds Have Lived

A wingless rooster recently received by the Smithsonian Institution has defied precedents established by fowls that have been hatched without wings heretofore by living to grow into healthy adulthood minus the customary appendages. In all other such cases known to science the wingless birds have died while still young chicks.

The present specimen was found in the flocks of Mrs. Olio Deering, of Rose Hill, Ky., who sent it to the institution. Its behavior seems to be normal in most ways, but it is afraid to make jumps that would not bother an ordinary chicken. It hesitates a long time, for instance, before jumping from a table to the floor to obtain food, even when it is very hungry.

Far-Seeing Romanticist

Frenchman Predicted Phonograph Long Before It Became Reality

Admirers of Theophile Gautier, the great French romanticist, point out that he foreshadowed the phonograph many years before it became a reality. In 1847 Gautier wrote in La Presse: "One day it will be possible to make a polished plate receive and preserve the vibrations of sound, and thus conserve and perpetuate a melody by Mario, a tirade by Rachel, or a couplet by Frederic Lemaitre. Thus we shall be able to keep hanging on the wall the serenade of Don Pasquale, the imprecations of Camille, the love declarations of Ruy Blas—records of an evening when the artiste is in good form."

Producing Poultry Meat

Experiments at the Central Experimental Farm, Ottawa, have shown that it takes 28½ pounds of mixed grain to grow Barred Rock cockerels to twenty-six weeks of age, weighing an average of 6.68 pounds. That is, with a good class of Barred Rock chicks, 4¼ pounds of grain can be converted into one pound of meat. The lighter breeds consume an average of six pounds of feed for each pound of gain in meat.

Wife (during domestic argument): "I think you are very unreasonable, John."

Husband: "I certainly was. I expected you to be reasonable."

England's oldest working bootmaker has died at Bury St. Edmunds, aged 90. He had a curious stone, 120 years old, on which he pummelled the soles and top leather.

Hundred Tons Of Glass

Melted For Huge Telescope Will Take 10 Months To Cool

The mold for the 200-inch telescope mirror, the 17-foot wide "eye" which will see four times farther than ever before, is ready at the Corning Glass Works.

Its pouring, of molten pyrex borosilicate glass, the first step in a daring astronomical venture expected to reveal objects 1,000,000,000 light years distant as they looked many million years before even the lowest forms of life appeared on earth, is planned soon.

Five years ago, astronomers, with a grant of $6,000,000 from the International Education Board, began their plans to build this telescope, twice as large as any now existing. The crux was the huge mirror.

Eight months ago the trial-horse mirror, 120 inches in diameter and a baby compared with the 17-footer, yet itself the biggest one ever made, was poured into a mold like the big one now waiting. Five months it took to cool. Recently it was taken from the mold. It is a five-ton piece, yet so perfect that there are only the slightest of strains in it anywhere. It proved the theoretical work sound, and preparations began for the giant mirror.

About 100 tons of glass will be melted in a furnace the size of a small hall. From this the molten material will be dipped with iron ladles bigger than wash tubs. They will take about ten hours to pour the mirror. Then it will take about ten months to cool in an electrically heated annealing box. Upon the slow cooling of this annealing process the success of the mirror depends.

When finished, it will be shipped to Pasadena, where many months will be spent in grinding and shaping it, at a site still unnamed, on a mountain top somewhere in Southern California. There the telescope will be completed, in charge of the California Institute of Technology and co-operation with the Carnegie Institution of Washington, which has the world's present largest telescope on Mount Wilson.

Has Withdrawn For Good

Japanese Journalist Says Break With League Is Final

Japan will never again become a member of the League of Nations, according to Juro Kishiy Kishiy, assistant manager of the Japancse daily newspaper "Nichi-Nichi," who said in an interview at Victoria, "My country has no intention of reconsidering her withdrawal from the Geneva conference.

"It is not necessary for Japan to be a member of the League of Nations," he said. "We wish to take our part in keeping the peace of the world but we consider the policy of the league is not good for Japan. Before the league can be a success, all the countries must understand each other."

Japan is not looking for war with Soviet Russia, Kishiy asserted. What is going on at present, he said, is a peculiar propaganda prompted by Russia agencies. "It is propaganda of this kind that Russia always adopts when she has a serious domestic situation on her hands," he added.

Saved His Life

Man In Northern British Columbia Used Knowledge Of Telegraphy To Bring Assistance

William Scott served with the British navy as a radio operator during the Great War and that fact probably saved his life in a battle with the northern wilderness, a battle fought while his life-blood oozed from him.

He severed an artery in his foot while chopping firewood at his camp near Echo Lake, B.C. Binding it as best he could, he walked five miles through the cold rain that turned snow to slush, to find the nearest refuge on the Yukon telegraph line.

There he brought his knowledge of telegraph into play to call operator F. Appleyard at Echo Lake, eight miles distant.

Appleyard plunged through storm and darkness to render first aid to the injured man, exhausted from loss of blood and his fight to reach shelter.

Home Care Of Meat

Meat when received in the home should be removed at once from the paper wrapping, placed in a clean covered dish and put in the coldest place in the food compartment of the refrigerator. If meat is kept at a temperature of 40 degrees F., with the air circulating in the food compartment freely, it will keep as long as is usually required for home consumption. — Dominion Live Stock Branch.

The population of the Soviet Union is about 40 millions more than that of Continental United States.

And we will know that good times are back again when Father turns in his new car for a newer one.

The average American attains the greatest capacity to learn between the ages of 20 and 25.

In Times Of Emergency

Central Bank May Not Have Elasticity Of Finance Act

Present and future ministers of finance will have a fairly rigid advisory body to "aid" them when the new Central Bank is established and operating. But those of them who are individuals may find, in moments of crisis, that the central bank will hamper them in working out the best solutions of emergency situations.

During the war, Sir Thomas White gave Canada's affairs a financial direction that was masterly. He sought and obtained advice from the best possible sources but having no permanent advisory body to bother him he was not tied down to conformity to their prejudices and red tape.

Likewise, the Finance Act to-day has an elasticity about it that greatly helps the Minister of Finance in meeting the country's financial problems.

There is a classic story about the Westerner to whom Sir Sam Hughes offered a commission. The war minister asked this man if he wanted to join the infantry or the cavalry. The reply was "The infantry. When we get into trouble I don't want to be hampered with no horse."

In days to come many a finance minister, facing conditions such as those exist to-day, may wish that he were not hampered by "no horse."—Financial Post.

More Canadian News

New York Times To Open Bureau In Ottawa

Decision of the New York Times, one of the world's finest newspapers, to open a bureau in Ottawa for the purpose of keeping its readers informed of the course of events in this country, is an important development bound to prove of advantage to Canada.

For many years the criticism has been levelled against the press of the United States—and not without reason—that it is not at particular pains to learn very much about what happens north of the international border or to devote more than infinitesimal space to news of Canadian origin. One may search entire issues of the so-called metropolitan newspapers of the great cities to the south without finding a single reference to Canada or the Canadians, whereas even the smallest of the Canadian dailies carries its due quota of United States news. The Ottawa bureau will be in the capable hands of John MacCormack, hitherto its correspondent in Vienna. — Brockville Recorder and Times.

Worse Than Pestilence

Alarming Increase In Number Of Motor Car Fatalities

That the automobile is a destructive and death-dealing machine is again indicated by the appalling number of fatalities in the United States due to motor accidents. Figures compiled by an insurance company show that 29,900 Americans were killed in auto mishaps last year; and while this is only a small increase over the total for 1932, the dismaying fact is revealed that the death list was proportionately a good deal higher.

Thus it is pointed out that the death ratio of fatalities to the number of accidents has increased nearly six per cent., and that the increased number of deaths occurred despite the fact the total auto registrations and gasoline consumption had dropped.

The annual death toll exacted by the motor car both in Canada and the United States should occasion serious thought. If some pestilence were sweeping the country we would organize all our forces to check it. We should not sit idly by and accept the frightful auto death toll as one of the inescapable hazards of modern life.

Dangers Of Communism

Stanley Baldwin Says Every Country Looking To Britain As Stronghold Of Freedom

Warning against the dangers of Communism, Fascism and dictatorships generally was given by Stanley Baldwin, Conservative leader, in a recent address in London.

"Dictatorship is like a great beech tree—nice to look at, but nothing grows underneath it," said the lord president of the council in the British cabinet. "And when the original dictator goes, chaos often results.

"If there is one thing certain to my mind it is that if people here become adherents of either Communism or Fascism in great numbers, the only end will be civil war."

Mr. Baldwin declared every country in Europe was looking to Britain as the last stronghold of freedom, "standing like a rock in the tide threatening to submerge the world. It would be an act of consummate cowardice, an act of surrender, to think of having a dictatorship."

Apricot Custard Tarts

¼ cup sugar
¼ teaspoon salt
2 egg yolks
½ cup mashed stewed apricots
½ teaspoon lemon juice
1 tablespoon Benson's Corn Starch
1 cup scalded milk
¼ teaspoon vanilla
3 tablespoons sugar
2 egg whites.

Mix and sift together the first quantity of sugar, the salt and corn starch, then gradually add hot milk and cook in double boiler until thickened. Add well beaten yolks and cook for a minute longer. Stir in the vanilla and cool. Pour the mixture into previously baked tart shells and cover with meringue made by adding the cold stewed apricots mixed with the second quantity of sugar and the lemon juice to the stiffly beaten whites of the eggs, and beating until the mixture holds its shape. Brown slightly in a rather hot oven.

More than 900 airmen's lives have been saved by parachutes since 1926.

Austria now has less than 280,000 registered unemployed.

Unsinkable Lifeboats

Many Devices Used Make Them Expensive To Build

"Wonder-boats" is a description that has possibly not yet been applied to the craft of the Royal National Lifeboat Institution, yet it is not inappropriate. In the Institution's fleet are boats that can free themselves of water as rapidly as it comes on board. They can keep afloat when every one of the watertight compartments has been damaged and open to the sea.

If capsized they can right themselves and empty out all water in 25 seconds, and in the case of motor-propelled boats, continue running when the engine-room is flooded.

I was given these facts when I talked to Lieut.-Colonel C. R. Satterthwaite, secretary of the Royal National Lifeboat Institute, about the boats that during the last few days have saved many lives from the fury of the easterly gales, states a London newspaper special representative. I also learned how it is that a boat full of water can immediately empty itself.

"On the bottom of most boats in our Fleet and on the sides of some of the latest models," said Colonel Satterthwaite, "are relieving valves or scuppers. These only allow the water to pass one way. As fast as the sea fills the cockpit of a lifeboat it is automatically emptied out at the bottom or sides. That is perhaps not the most remarkable feature of lifeboat construction.

"Not many people know that a lifeboat can have twenty holes knocked in each side, and yet still be able to go on with our work. This is due to the fact that a lifeboat is divided into from seven to fourteen watertight compartments, and has from 70 to 160 air-cases. These air-cases made her practically unsinkable, and a boat can be kept afloat by these even when each of the watertight compartments is open to the water. In view of these devices it is hardly surprising, perhaps, that the modern motor lifeboat costs from £8 500 to £9,000."

Kubelik's Fingers Valuable

Famous Violinist Has Them Insured For Large Sum

The fingers of Kubelik, the violinist, are heavily insured. The first, second and third fingers and the thumb of his left hand are insured for $13,500 each; the little finger is insured for $11,000.

The right hand is cheaper. The first, second and third fingers are marked up at $34,500 for the three. The thumb is assessed at $4,500; the little finger at $2,350.

Appleford PAPER PRODUCTS HAMILTON, ONTARIO

Executive of Millers' Association Says Better Quality Of Grain Is Grown In Southern Districts

A major matter for consideration in connection with Canada's wheat marketing problem is the question of grading, stated C. H. G. Short, honorary president of the Canadian National Millers' association, upon his return to Montreal from a visit to Western Canada.

For a long while, he said, "the southern farmer has been carrying the northern farmer upon his back. Wheat from the northern territories of lesser quality should be graded on its merits and the southern farmer should receive for his superior quality a premium in price above that received by the farmer in northern areas.'

Over-all average quality of Canadian wheat was materially reduced by the lower grades from the northern areas, which primarily resulted, Mr. Short said, from the variety of lesser quality and earlier ripening wheats shown, notably Garnet.

"Either the lesser variety of wheats should be outlawed, which is the policy the Argentine evidently intends to pursue, or they should be graded separately and sold on their relative values, in order that Canada's previously high standard quality grades shall not continue to be impaired but shall be rehabilitated to maintain their wide margin of world's superiority," Mr. Short said.

If such a method of grading were adopted and as a result the northern farmers discovered that the continuance of the growing of such wheats proved unremunerative, it would drive them into other and more remunerative types of farming, he said. This would automatically help to bring about desired reductions of wheat acreage, and, at the same time, automatically ensure the raising of the average level of the Canadian crop.

No Statistics Available

No Reliable Knowledge Of World Wheat Acreages

"At the outset, it must be stated that a complete enumeration of world wheat acreage is impossible, because no statistics are available for a few large producing areas and for many smaller countries", said Dr. T. W. Grindley, chief, Agricultural Branch, Dominion Bureau of Statistics, in discussing trends in world wheat acreage at the World's Grain Conference. China, of course, is an outstanding example of a country of which we have no reliable knowledge of crop acreages. By some authorities, China is rated as the world's largest wheat-producing country, but since her yield per acre is raised very high by intensive methods, it is probable that her wheat acreage is less than in Russia or the United States, and perhaps India. The other countries of possible importance in wheat-growing which have no reliable statistics that could be included in a study of trends are two South American countries, Ecuador and Venezuela; Albania in Europe; Abyssinia in Africa; and Persia, Arabia, and Afghanistan in Asia. The Food Research Institute calculates that the highest current estimates of the so-called world production cover only about 80 per cent., more or less, of the wheat actually produced in the world.

Jericho Beyond Jordan

Henry Eighth Gave Biblical Names To Place Near London

Do you know a Jericho lying beyond Jordan and yet within 25 miles of London? It was there that Henry the Eighth often spent his week-ends with the latest lady of his heart. This old-world spot, redolent with history and romance and practically untouched by the passing of Time, is near Ongar, amid the Essex woodland. Here runs Jordan; and close by lies Jericho in all the glory of its Tudor red brick, with cedars of Lebanon, arbors festooned with roses, laurel hedges, the most resilient of green lawns and towering hollyhocks. It was one of Henry's whimsicalities that induced him to bestow these Biblical names on a little Essex rivulet and the adjacent mansion. Little did he realize, however, that at the same time he was providing the English-speaking races with that expressive phrase, "Go to Jericho!" For so boring was the work for his courtiers in this lonely retreat—Henry demanding their presence but rarely giving them anything to do—that when one member of the court wanted to be rude to another he would exclaim, "Oh, go to Jericho!"

Entitled To Damages

A baker at Neuminster is endeavoring to obtain damages from a customer who used one of his plum puddings as a door mat. The baker had just boiled a magnificent pudding and put it on the doorstep to cool when a short-sighted customer arrived. Mistaking the plum pudding for a round door mat, he began to wipe his muddy boots on it, when it began to crumble away.

Defends Northern Route

Senator From Whitewood Says Churchill Route Will Greatly Benefit Canada

Only one casualty occurred on the Hudson Bay route in 1932 and 1933 as compared with three on the St. Lawrence, Hon. A. B. Gillis (Cons., Whitewood) stated in the senate in a defence of the northern route.

"By reason of the opening up of the Hudson Bay route," he declared, "if the grain grower car get a few cents more for his grain or the stock-breeder can obtain a few more dollars for his animals, it would undoubtedly bring a greater degree of prosperity to Canada. To oppose the development of this, or any other port, would be to impair the progress of the whole Dominion."

Great possibilities existed for the development of the northland of the country through the route, said Senator Gillis in speaking of his visit to Churchill last summer.

In the last two seasons it had been learned that the difficulties of navigation in these northern waters could be overcome without very much difficulty, he declared. It was never intended the Hudson Bay railway should be a colonization road, the object being to provide an outlet for products of the millions of acres of the prairie provinces.

"No doubt," said Senator Gillis, "valuable mineral discoveries will be made. As a matter of fact two branch line tributaries to the Hudson Bay line are in operation to mines which are now producing mineral wealth."

As to the question of navigation, the Hudson's Bay Company navigated these waters for the last 265 years and were now supplying 234 posts. He had been unable to find any record of mishap in the operations of the company in these long years.

CHARMING IN PRINT CREPE IN NAVY AND POWDER BLUE WITH UNIQUE BAND TREATMENT IN PLAIN POWDER BLUE

Can't you imagine how fascinating this modish scheme would be for this darling slender little model? The belt repeats the lighter blue tone.

Black plain mossy crepe with bisque shade is a newly smart combination you'll like. The belt can be of the black crepe, if you feel your figure needs slimming.

Naturally all one shade can be used if you prefer it, and a very chic little dress will be the result, either in silk or lightweight woolen.

Style No. 452 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Size 36 requires 3¾ yards of 39-inch material with ¾ yard of 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A Bad Reputation

Nationalization Question Is Reviewed In House Of Commons

Children of Canadian parents born in a foreign country where the father is serving as an official of the Canadian government, are not Canadians so far as immigration laws are concerned and may be admitted to Canada only as a privilege—not as right.

Major C. G. Power, (Lib., Quebec South), brought the question before the supply committee of the house of commons during consideration of the estimates of the secretary of state. He thought this a bad regulation, particularly in view of the fact that at some future time such a person might become a public charge and be deported to the country of birth.

Hon. C. H. Cahan, secretary of state, agreed that such children should be Canadian citizens by right, and recalled that a few years ago he introduced a bill to make the necessary change in the law. The bill got a poor reception and was withdrawn.

"I am sorry to say I think I opposed that bill," Major Power observed. No hardship had as yet resulted from this law, the minister said.

F. Luchkovich, (U.F.A., Vegreville), A. A. Heaps (Lab., Winnipeg North), and Thomas Hay, (Cons., Springfield), made a plea for special consideration of aliens who had been in the country for many years but failed to master either the French or English language and were barred from naturalization. In many cases their children were naturalized and had served the country in the war, while the parents remained outside the pale because of the language difficulty.

Mr. Cahan said it would be very difficult to legislate on behalf of these people, but a certain degree of leniency could be exercised by the magistrates hearing the naturalization claims.

High Protein Wheat

Is Usually Associated With Low Yield, Says Dr. Larmour

"High protein content in wheat usually goes with low yield," Dr. R. K. Larmour, in charge of the milling and baking laboratory and wheat testing work at the University of Saskatchewan, said when commenting on the strictures of C. H. G. Short, honorary president of the Canadian National Millers' association, on northern grown grain.

Dr. Larmour agreed that there should be some method of giving a higher price for high protein wheat. Some of the samples of wheat from the southwest of Saskatchewan, tested at the Saskatoon laboratory, had shown as high as 19 per cent. protein. Such wheat would blend up a considerable quantity of low grade wheat. Wheat of as low as 6.7 per cent. protein had been received from the north of the province. An average wheat for good strong Canadian flour would run 14 per cent. protein.

A copy had recently been received at the University of Saskatchewan of the December number of a British commercial publication, the "Brabender News". Dr. C. W. Brabender, who acts as an expert advisor to European millers on the flour quality of wheats, wrote: "Several years ago a new wheat arrived from Canada. The wheat had shown admirable agronomic chracteristics and had most beautiful looks. The kernels were slightly longer, but otherwise looked the same as the finest No. 1 Marquis. The name of the wheat was Garnet. The millers grabbed it. The result was disastrous."

Worth Of The Dairy Cow

Over Two Million Tons Of Grain Marketed Annually In Canada Through Dairy Cow

From figures available, says the superintendent of the Dominion Experimental Farm at Agassiz, B.C., it is learned that well over two million tons of grain are marketed annually in Canada through the dairy cow. In one year alone the revenue from dairy products approached close to the three hundred million dollar mark. Thus, in her sphere of activity, the dairy cow not only manufactures the most important food-stuff known, but also serves as an appreciable agent in the marketing of the world's grain supply.

Of Least Importance

An Irishman was relating an experience of hardship in the jungle.

"Ammunition, food and whisky had run out,' he said. "We were parched with thirst."

"Was there no water?" asked a listener.

"Shure, but it was no time to be thinking of cleanliness," replied the Irishman.

National War Memorial

Canada's national war memorial, originally designed to be placed in Connaught Place in the capital, will cost slightly more than $240,000 and is still in the course of construction, the house of commons was informed.

Of all the world's cities of 100,000 or more people, seven out of ten are located on the water, and 34 per cent. are on the sea coast.

FAMOUS RAILWAY DOG RETIRES

Canadians who in their journeys through London have been in Euston Station, will remember "Victor", the famous dog that used to aidle up to passengers with a collecting box on his back. Victor, after collecting almost $12,000 for charity, during his six and one-half years in the station, has retired. His place has been taken by "Jack", a two-year-old curly coated retriever, that hopes to carry on the good work. Our picture shows Victor (left), mournfully contemplating his retirement, while Jack happily looks forward to a busy future.

Canadian Wheat Wanted

Millers Require Hard Canadian Wheat To Mix With Softer Grades

Speaking of the wheat situation from an importer's point of view, Mr. G. J. S. Broomhall, the international wheat trade expert, told the Regina conference that it might perhaps be emphasized that wheat growers are still in a favoured position, in that they can put on the market the most valued foodstuff of civilized man. And in this matter Canadians were particularly fortunate, for they grew a wheat that is desired by millers in all countries. It was true that all millers do not, and indeed cannot, buy Canadian strong wheats, because many countries in Europe, and some outside Europe, had imposed such high duties and milling restrictions that Canadian and other overseas wheat are effectively excluded. But that did not alter the fact that millers want Canadian wheat, especially when they are compelled to mill a very high per centage of soft native wheat.

Jersey Cattle In Alberta

Province Ranks Fourth In Total Registration For Canada

Gratifying growth in herds and in production of Jersey cattle and milk in Alberta during the past year were reported to the annual meeting of the Southern Alberta Jersey Cattle Club by W. T. Hunter of Vernon, western field representative of the Canadian Jersey Cattle Club. He referred to a marked increase in demand for Jersey milk, not only in Western Canada, but throughout the Dominion. During the past eighteen months, Hunter said, 300 Jersey cows were brought into Edmonton and Calgary districts, most of them from British Columbia. Alberta now ranks fourth in the Dominion in total registration and transfers of Jersey cattle, Ontario, Quebec and British Columbia leading in that order.

Fifty Years' Farm Labour

In 1881 there were 1.43 persons gainfully employed per farm in Canada. In 1931 the number was 1.55 per farm. In 1881 there were 33.07 acres of improved land per worker while in 1931 there were 76.01. In other words, the improved acreage per farm more than doubled during this period of fifty years although there was practically no change in the number of persons engaged on these farms.—Dominion Economics Branch.

Assistance For The Blind

May Take Form Along The Line Of Old Age Pensions

Hopes that, if Canada makes a speedy economic recovery, action may be taken soon to provide financial assistance to the blind along the line of old age pensions, was held out by Prime Minister R. B. Bennett in the house of commons.

During consideration of the miscellaneous estimates the discussion arose over an item granting assistance to two blind intitutions in Montreal. The prime minister said that some of the provinces had enacted legislation providing for their participation in a scheme which would give old age pensions to blind on reaching the age of 40. No uniformity had as yet been attained, the prime minister said, but he intimated nothing but financial stringency was delaying action in this respect.

Dr G. D. Stanley (Cons., Calgary East), urged that the government purchasing agents make as much use as possible of articles manufactured in blind institutions. The prime minister said he believed everything that may be done to help the blind in this way would be done.

Success With Clover

Young Saskatchewan Farmer Wins Several Awards

Louie Wendel, a young farmer living south of Neudorf, Sask., has achieved considerable success in showing sweet clover at the different grain shows during the past year. He obtained the following standings in this class of grain: At Regina World Grain show, 2nd prize; at Chicago, 7th prize; at Saskatoon, 1st prize and also special prize, which gave him possession of the Darnborough cup. At all these shows he had the highest standing of any entrant from Saskatchewan in this class of grain. At the present time he is specializing in the growing of barley and expects to come to the front in this class of grain in the near future.

Old Tradition Upset

An ancient tradition of Scottish agriculture has been upset by an order from Glasgow for a carload of Alberta Percheron horses. Clydesdales are "the horses" of Scotland, but dockyard authorities at Glasgow have tried out Percherons brought in from France and finding them more suitable for their special work, have placed the Canadian order.

A worm may turn, but it looks much the same on the other side.

FOOTPAD: "Ow'd you like to give me a fifty-dollar donation to that Cottage Hospital you'll be in if you don't?" —London Opinion.

Declares Present Is No Time For Canada To Embark On Scheme To Attract Immigrants

There is no time for Canada to embark on a grandiose scheme to attract immigrants, the house of commons was advised by Hon. Wesley Gordon, minister of immigration. And his views were shared by James S. Woodsworth, leader of the C.C.F., and Hon. Charles Stewart, a former Liberal minister of immigration.

"I think the time will come," said Mr. Gordon, "when this country will again be sufficiently attractive so that many more hundreds of thousands of people will come here from the United Kingdom." But present conditions did not warrant a lowering of the immigration bars.

The name of Brig.-Gen. W. L. Hornby, of Lethbridge, Alta., loomed large in the discussion as estimates of the department were under consideration. No concrete plan to bring British settlers to Canada had been placed before him by Brig.-Gen. Hornby in the two discussions he had had with him, said the minister. He had not encouraged Brig.-Gen. Hornby to approach provincial governments on British immigration. Members told the house of receiving pamphlets on the reported Hornby scheme to bring British settlers into the country.

John Vallance (Lib., South Battleford) introduced the subject and said he understood Brig.-Gen. Hornby was proposing a settlement of British settlers in a part of his constituency. The minister replied he had not heard of this action.

To Hon. Ian Mackenzie (Lib., Vancouver Centre), the minister said no plan to further British immigration had been suggested to Canada by the British government.

Hon. D. M. Sutherland, minister of national defence, had been solicited by Brig.-Gen. Hornby for support of his settlement plan. He (Col. Sutherland) considered Brig.-Gen. Hornby much of a "visionary".

History Of Canadian Wool Grading

Principle Has Now Become General Among Sheep Raisers

The present-day high quality of Canadian wool is due in the main part to grading which was started by the Live Stock Branch of the Dominion Department of Agriculture in 1913. At that time the care taken in the growing, shearing, preparation for market, and marketing was such that Canadian wools were discredited not only in the home market but in foreign markets as well. Graded wool easily sold at higher values than ungraded, and on this account the efforts of the government officials were soon crowned with success. Grading became very popular in a short time and at first was performed locally, often at a number of points within a province. These grading centres not only acted as marketing points for graded wools, but also served as an excellent medium for farmers in ascertaining the relative market value of the various wool grades and the necessity of putting up the wool in proper shape for market.

When once the local organization work had been completed, and a knowledge of the wool grading principle became general among sheep raisers, it was thought best to establish the co-operative marketing and sale of wool on a purely commercial basis, and in 1918 representations of the various associations met in conference and organized the Canadian Co-operative Wool Growers, Limited, an organization with which are now affiliated some thirty local wool growers' associations. The headquarters at Toronto now acts in co-operation with the various associations in arranging for the collecting and forwarding of wools consigned for grading and co-operative sale. It also acts as selling agents for such wools for all the associations affiliated with it. The Dominion Live Stock Branch still assumes responsibility for the wool grade standards and provides official wool graders for the grading of co-operative shipments.

No Sand In Sandpaper

Abrasive Particles Are Specially Crushed Flint Or Garnet

Familiar as sandpaper is to everybody, yet there are very few persons, indeed, who know that this universally used product has no sand in it.

Sand cannot be used for making sandpaper because it is not efficient for that purpose, due to the fact that most sand is waterworn and the particles are therefore more or less rounded and have no sharp cutting edge.

The fine abrasive particles on sandpaper are specially crushed flint or garnet or are products of the electric furnace, aluminum oxide or silicon carbide.

The abrasive particles used in the manufacture of sandpaper, with a few exceptions, are not true crystals, nor are they alike. The particles, though carefully graded, vary in size and shape and have many edges and points, some of which are much sharper than others. Best results are obtained from grits approximately twice as long as they are wide.

Moving Victoria Memorial

Column To Be Placed At Entrance To Warwick Gardens

The Queen Victoria memorial column in Kensington High street is shortly to be moved to the large open space at the entrance to Warwick Gardens, says the News of the World. This step has become necessary because of the great increase of the traffic on the main road westward out of London. The memorial was erected by public subscription outside the main entrance to St. Mary Abbott's church in 1904. St. Mary's is one of the few important churches in England where there is a clock without a face. Passers-by are surprised to hear the clock chime and strike the hours, while they look in vain for the face and hands.

Horses On The Farm

A striking comparison is afforded by the numbers of improved acres per horse on farms in the prairie provinces for the two most recent census years (1921 and 1931). In 1921 the acreage of improved land in occupied farms was 44,863,266 and the number of horses 2,239,873, or 20 acres per horse. In 1931 the corresponding numbers were 59,854,632 acres and 2,062,684, or 29 acres per horse.

Drifted Thousand Miles

A bell and lantern buoy that drifted from its station at Cape Braker, Nova Scotia, in November of 1928, has been found beached on Turks Island, according to word reaching the department of marine agency at St. Johns, New Brunswick. In five years the buoy drifted at least a thousand miles. It will be returned to Canada and replaced in service.

Money isn't everything, but it helps until something better comes along.

Subject Of Scientific Test

Study Being Made Of Insect Population Of Britain

The first attempt to obtain a census of Britain's insect population is being completed at the Rothamsted Experimental Station, Harpenden, the oldest centre of agriculture research in the United Kingdom.

Insects are drawn to an automatic "light trap," counted, the period of the night at which they arrived noted, and the motives for their activity analyzed. Already it is obvious that the insect population is many times greater than had been supposed, and a "rare" collectors' specimen has proved to be a common inmate of the trap.

Some 180,000 insects represent an eleven months' "bag." Ultimately it is hoped to translate such figures into proper census form, reports the New York Times.

Of even more interest to farmers are the extraordinary day-to-day variations which take place. In July there was a drop from nearly 6,000 to 50 on successive nights, while of 506 insects caught in January, 425 were taken in one night and 400 in less than two hours.

To explain these sudden changes in habit, comparison is made with a whole series of weather records, while a special instrument has been invented which records the amount of bright moonlight at all periods of the night. Another new instrument makes a record of night cloud. Warmth, cloud and calm seem to be three factors which cause an immediate increase in activity.

Records are also being kept of the dates when particular insects are first and last caught, and of the number of successive broods.

Some insects have been found to fly early and others late. Others, again, indulge in both an evening and a dawn flight.

An Ancient Banknote

Issued By Bank Which Closed 69 Years Ago

Yellow with age, but still in a good state of preservation, a 95-year-old banknote issued by the Charlotte County Bank of St. Andrew's, New Brunswick, is treasured by Mrs. H. D. Archibald, Starbuck, Manitoba. Her husband brought it west with him 27 years ago from Sackville, N.B. Two shipping scenes showing four-masted sailing vessels and bales of merchandise grace the note, dated March 8, 1839. The bank closed in 1865, but did not fail.

Fasted For Health

C. J. Wright, 68-year-old grocer of Roswell, New Mexico, has ideas of his own about how to cure a stubborn case of catarrh. Wright fasted 30 days, during which time he declared his catarrh not only disappeared but his general health was improved." After studying the matter for many years Wright says he is convinced that most bodily ailments are caused by overeating.

Rayon production in Japan last year was 50 per cent. above that of 1932.
